

## **APPENDIX 8**

At the December 7, 2011, public meeting, COAC voted and approved the following recommendation from the Antidumping/Countervailing Duty subcommittee:

“In order to effectively and efficiently administer AD/CVD laws and maximize revenue collection, CBP, along with other agencies such as Commerce and Treasury, should jointly design a prospective AD/CVD system. Since legislation will be needed, CBP should consult relevant Congressional committees throughout the development process, so that future regulations will be workable. Given the amount of analysis which already exists on this topic, a framework should be established to facilitate both public comment and legislative activity in the next 12 months.”
