**20a. How does the Committee accomplish its purpose?**

The committee addresses topical issues such as bioenergy, genomics, structural biology, biogeochemistry, and Earth system observation and modeling. The committee forms subcommittees, with DOE approval, of BERAC members and other scientists to address charges from the Director of the Office of Science and to review and make recommendations on current and future program plans and progress. Subcommittee draft reports are presented to the committee for discussion, modification, and approval. These reports review ongoing research programs from a broad programmatic point of view and examine opportunities for extending and improving programs.

**20b. How does the Committee balance its membership?**

The composition of the membership is very broad and diverse, and reflects the multi-disciplinary program scope and interests of the Office of Biological and Environmental Research. The research areas covered include genomics, cellular and molecular biology, data management and analytics, environmental and Earth system sciences, and structural biology. Members come from public and private universities, Federal agencies, and private industry. Particular attention is paid to obtaining diverse membership with a balance of disciplines, interests, experiences, points of view and geography.

**20c. How frequent and relevant are the Committee Meetings?**

The full committee meets at least two times a year. The meetings are very relevant and important to the Office of Biological and Environmental Research. The meetings serve as opportunities for information exchange between the full committee and the Office. Reports of subcommittees are discussed, modified, and approved or returned to the subcommittees for additional work. Changes and plans for the Office are presented and discussed. New and ongoing charges from the Director of the Office of Science are presented and discussed.

**20d. Why can't the advice or information this committee provides be obtained elsewhere?**

No other committee exists within or outside of the DOE that has the breadth of knowledge and/or expertise needed to review the programs and plans of the Office of Biological and Environmental Research to address the Department's energy,

environmental and science missions. Because the committee is dedicated to the Office, it has insights into the programs and their management that provide a sound and broad base from which to make its recommendations. In addition, the regular turnover of the membership brings fresh points of view to the committee.

**20e. Why is it necessary to close and/or partially closed committee meetings?**

N/A

**21. Remarks**

None

**Designated Federal Officer**

Dorothy Koch Associate Director, Office of Biological and Environmental Research

## Narrative Description

DOE's mission is to advance the energy, environmental, and nuclear security of the United States; promoting scientific and technological innovation in support of that mission; sponsoring

basic research in the physical sciences; and ensuring the environmental cleanup of the nation's nuclear weapons complex. The Department also has three strategic goals toward achieving its mission: 1)Science and Energy; 2)Nuclear Security; 3)Management and Performance. With respect to the Science and Energy strategic goal, DOE leads the nation in the transformational research, development, demonstration, and deployment of an extensive range of energy and efficiency technologies. The DOE world-leading research in physical, chemical, biological, environmental, and computational sciences contributes fundamental scientific discoveries and technological solutions that support the nation's primacy in science and innovation. The committee ensures that BER supports a balanced and state-of-the-art research portfolio of research projects that contribute to all aspects of the DOE mission and impacting all strategic goals.

**What is the approximate Number of recommendations produced by this committee for the life of the committee?**

597

### **Number of Recommendations Comments**

Since January 2006, 34 reports have been issued covering all aspects of user facilities, research, planning, and program management for the Office of Biological and Environmental Research. These reports contain more than 500 separate and distinct recommendations with individual reports having as few as three and as many as eighty recommendations. 30 new recommendations across three BERAC reports in FY24.

**What is the approximate Percentage of these recommendations that have been or will be Fully implemented by the agency?**

80%

### **% of Recommendations Fully Implemented Comments**

All separate and distinct recommendations have been evaluated and considered and an estimated 80% or more have been implemented.

**What is the approximate Percentage of these recommendations that have been or will be Partially implemented by the agency?**

20%

### **% of Recommendations Partially Implemented Comments**

An attempt is always made to at least partially implement those recommendations that are not or cannot be fully implemented.

**Does the agency provide the committee with feedback regarding actions taken to implement recommendations or advice offered?**

Yes ☒ No ☐ Not Applicable ☐

**Agency Feedback Comments**

Reports on progress and implementation made at subsequent Committee meetings and/or in writing are posted on the Committee website.

**What other actions has the agency taken as a result of the committee's advice or recommendation?**
