20a. How does the Committee accomplish its purpose?

Section 402(b)(9) of the Public Health Service Act states that “the Director, NIH...shall assure that research at...the National Institutes of Health is subject to review in accordance with section 492.” Section 492(b) states that the “Director of NIH shall establish procedures for periodic technical

and scientific peer review of research at the National Institutes of Health. The mission of the Board of Scientific Counselors is to assess the quality of the Institute's intramural research programs and to evaluate the productivity and performance of intramural scientists and shall also, as requested by the Director, NIH, undertake peer review of extramural funding applications as required by section 492 of the Public Health Service Act, as amended." The Board is composed of scientific and technical experts. The Board continues to provide indispensable evaluation and advisory functions in the science management of the intramural research programs. Besides the formal meetings for peer review of each laboratory, the chairman and individual Board members are frequently consulted for advice on staff appointments and program development. The actions of the laboratories reviewed are in keeping with the recommendations of the Board. The Board provides the National Advisory Allergy and Infectious Diseases Council with a review and description of its activities.

20b. How does the Committee balance its membership?

The committee is composed of up to 15 members who are authorities knowledgeable in the fields of biochemistry, microbiology, immunology, and vaccine research as it relates to allergy and infectious diseases. Members work in universities and other organizations across the United States.

20c. How frequent and relevant are the Committee Meetings?

The committee met once, December 16-17, 2021, during this reporting period.

20d. Why can't the advice or information this committee provides be obtained elsewhere?

This Board is composed entirely of recognized biomedical and/or behavioral research authorities from outside the NIH in order to secure unbiased and objective evaluation of intramural research programs. Their recommendations are invaluable because the complex nature of research in each laboratory requires a unique balance and breadth of expertise not available on the NIH staff or from other established resources.

20e. Why is it necessary to close and/or partially closed committee meetings?

The Vaccine Research Center Board of Scientific Counselors, NIAID, closes meetings for the review, discussion, and evaluation of individual programs and projects conducted by the Institute, including consideration of personnel qualifications and performance, the competence of individual investigators, and similar items, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy. Section 552b(c)(6) of the Government in the Sunshine Act permits the closing of meetings where discussion could reveal personal information, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

21. Remarks

Committee Function: Other - Scientific and Technical Peer Review. Reports: This committee did not produce any public reports. URL: This committee does not have a website. The DFO and Decision Maker are the same person, Director of the Vaccine Research Center, NIAID. Limited resources and the strict confidentiality of the work of this Board make this a necessity. Dr. Georgia Tomaras was reassigned from member to chair

from 3/28/2022 until 6/30/2023.

Narrative Description

The goal of NIH research is to acquire new knowledge to help prevent, detect, diagnose, and treat disease and disability, from the rarest genetic disorder to the common cold. The NIH mission is to uncover new knowledge that will lead to better health for everyone. NIH works toward that mission by conducting research in its own laboratories. Section 402(b)(3) of the Public Health Service Act states that the Director, NIH . . . shall assure that research at . . . the National Institutes of Health is subject to review in accordance with section 492. Section 492(b) states that the Director of NIH

shall establish procedures for periodic technical and scientific peer review of research at the National Institutes of Health, and shall also, as requested by the Director, NIH, undertake peer review of extramural funding applications as required by section 492 of the Public Health Service Act, as amended. This Board assesses the quality of the Institute intramural research programs and evaluates the productivity and performance of staff scientists, necessary functions for the operation of a highly effective intramural research programs and shall also, as requested by the Director, NIH, undertake peer review of extramural funding applications as required by section 492 of the Public Health Service Act, as amended.
