20a. How does the Committee accomplish its purpose?

The Advisory Committe on Supply chain Competitiveness (Committee or ACSCC) advises the Secretary on the necessary elements of a comprehensive, holistic national freight infrastructure and a national freight policy designed to support U.S. export growth and competitiveness, foster national economic competitiveness, and improve U.S. supply chain competitiveness in the domestic and global economy. This Committee provides detailed policy and technical advice, information, and recommendations to the Secretary regarding:

national, state, or local factors that inhibit the efficient domestic and international movement of goods from point of origin to destination and the competitiveness of domestic and international supply chains; infrastructure capacity, inter- and cross-modal connectivity, investment, regulatory, and intra- or inter-governmental coordination factors that affect supply chain competitiveness, goods movement, and sustainability; emerging trends in goods movement that affect or supply chain competitiveness; and metrics that can be used to quantify supply chain performance. The Secretary uses this advice, information, and recommendations in interagency discussions in the development of a national freight policy. The Committee acts as a liaison among the stakeholders represented by the membership and provides a forum for those stakeholders on current and emerging issues in goods movement, ensuring regular contact between the government and the supply chain industries. The Committee advises and provides policy advice, information, and recommendations to the Secretary with respect to the formulation, coordination, and oversight of domestic and foreign policy related to supply chains for goods and services. In administering this committee, the Department of Commerce works closely with the Department of Transportation.

20b. How does the Committee balance its membership?

The Committee has a maximum of forty five (45) private sector members with a balanced and broad range of interests, including representatives from supply chain firms or their associations, stakeholders, community organizations, and others directly affected by the supply chain, as well as experts from academia. Appointments are

made by the Secretary, in consultation with the Department of Transportation, EPA, and other agencies, as appropriate. Members are appointed for terms of two years. (Membership Balance Plan is available in the FACA Database.)

20c. How frequent and relevant are the Committee Meetings?

The Committee meets as often as necessary as determined by the DFO, but not less than once per year.

20d. Why can't the advice or information this committee provides be obtained elsewhere?

The Committee advises the Secretary on the necessary elements of a comprehensive, holistic national freight infrastructure and a national freight policy designed to support U.S. export growth and competitiveness, foster national economic competitiveness, and improve U.S. supply chain competitiveness in the domestic and global economy. The functions of the ACSCC cannot be performed by the Department, another existing advisory committee, or any other federal agency. The input, advice, and recommendations on supply chain-related issues provided by the ACSCC are unique, representing the views of knowledgeable and experienced representatives of the supply chain industry and its stakeholders. These viewpoints are not available within the Department itself or from other advisory committees.

20e. Why is it necessary to close and/or partially closed committee meetings?
