**20a. How does the Committee accomplish its purpose?**

The EM SSAB provides the Assistant Secretary for Environmental Management (EM), the appropriate DOE Field Managers or Assistant Managers for EM activities, and any other DOE official the Assistant Secretary designates, with advice and recommendations concerning issues affecting the EM program at various sites. At the request of the Assistant Secretary or the Field Managers, the Board may provide advice and recommendations concerning the following EM site-specific issues: clean-up activities and environmental restoration; waste and nuclear materials management and disposition; excess facilities; future land use and long-term stewardship. The Board may also be asked to provide advice and recommendations on any other EM project or issue. Recommendations will be targeted toward actions within EM's mission.

**20b. How does the Committee balance its membership?**

Board membership reflects the full diversity of views in affected communities and regions and is composed primarily of people who are directly affected by site cleanup activities. Members include interested stakeholders from local governments, Indian Tribes, environmental and civic groups, labor organizations, universities, waste management and environmental restoration firms, and other interested parties. Selection and appointment of Board members is accomplished using procedures designed to ensure a diverse board membership and a balance of viewpoints.

**20c. How frequent and relevant are the Committee Meetings?**

Local board meeting schedules vary by site. Depending on the level of current clean-up activity, DOE site management may convene the full local boards on a monthly basis, or less frequently. Additionally, members representing each local board attend semi-annual EM SSAB Chairs meetings to discuss complex-wide EM issues.

**20d. Why can't the advice or information this committee provides be obtained elsewhere?**

The EM SSAB is charged with providing advice and recommendations on such issues as land use, site-specific cleanup criteria and risk assessment, priority setting, management effectiveness, cost vs. benefit analyses, and strategies for site waste management and disposal facilities. Involvement of affected parties early in the decisionmaking process is crucial to making economically feasible, environmentally sound, publicly acceptable decisions that can be implemented.

**20e. Why is it necessary to close and/or**

## partially closed committee meetings?

Board meetings are open and announced in advance in the Federal Register.

## 21. Remarks

**Number of Committee Members Listed: 199**

**Narrative Description**

The success of government activities at all levels depends on the support of an informed and participating stakeholder community. The support and understanding of citizens and stakeholders is of particular importance to the mission of cleaning up the nation's former nuclear weapons complex. The EM SSAB is a vital tool in DOE's effort to both inform stakeholders of policies and programs, and to solicit input and advice from affected groups and individuals.
