20a. How does the Committee accomplish its purpose?

This committee was composed of recognized biomedical and/or behavioral research authorities who represent the forefront of research and technical knowledge and who provide first-level merit review of highly scientific and technical research grant applications in the fields relevant to drug abuse and addiction including, basic and clinical neuroscience, basic behavioral science,

medications development, treatment, health services, epidemiology, prevention, human development, and AIDS. During this reporting period the committee reviewed 843 applications and requesting \$2,353,724,769 and reviewed 6 contract proposals.

20b. How does the Committee balance its membership?

Operation of the Special Emphasis Panel is accomplished using a fluid membership, with members designated to serve for individual meetings rather than formally appointed for fixed terms of service. The reviewers for each meeting are selected to evaluate grant applications or contract proposals for a specific, perhaps narrow, expertise area. Participants for each meeting are assembled to most efficiently and effectively cover the number and breadth of applications or contracts requiring review. The members designated to this committee are authorities knowledgeable in the fields of biomedical, basic and clinical neuroscience, basic behavioral science, treatment, health services, epidemiology, prevention, human development, and AIDS.

20c. How frequent and relevant are the Committee Meetings?

The committee held 51 meetings during this reporting period. The committee also conducted one workgroup meeting on March 14, 2025.

20d. Why can't the advice or information this committee provides be obtained elsewhere?

This committee was composed of recognized biomedical and/or behavioral research authorities who represent the forefront of research and technical knowledge and who provide first-level merit review of highly scientific and technical

research grant applications and contract proposals. These evaluations and recommendations cannot be obtained from other sources because the specialized, complex nature of the applications and proposals requires a unique balance and breadth of expertise not available on the NIH staff or from other established sources.

20e. Why is it necessary to close and/or partially closed committee meetings?

The meetings of the committee were closed to the public for the review of grant applications. Sections 552b(c)(4) and 552b(c)(6) of the Government in the Sunshine Act permits the closing of meetings where discussion could reveal confidential trade secrets or commercial property such as patentable material and personal information, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

21. Remarks

Per "2025 Secretary Directive" this FACA Committee has been terminated. NIDA SEP did not produce a report this fiscal year. Website: There is no committee website. The Committee Decision Maker and the Designated Federal Officer are filled by the same individual based on assigned duties within the IC. Meetings: The meetings on 2/3/2025, 2/25/2025 and 3/27/2025 were cancelled due to shifting administrative priorities and a temporary ban on public communications. The meetings held on 4/11/2025, 4/28/2025, 4/30/2025, 5/2/2025, and 5/7/2025, were not published in the Federal Register. Dr. Sheila Pirooznia's meeting, originally listed as spanning from 5/1/2025 to 5/6/2025, actually took place only on two days: 5/1/2025 and 5/6/2025.

There were no meetings held from 5/2/2025 through 5/5/2025. Members: Dr. Elizabeth Jacobs was inadvertently reported twice on the report for the previous fiscal year. The members of this Special Emphasis Panel (SEP) do not have standing appointments and serve on an as needed basis for meetings throughout the fiscal year. Therefore, the members list does not reflect appointment start and end dates. As often as possible, instead of appointment start and end dates, each meeting date on which the SEP member served is identified on the Members list. When necessary to protect peer review integrity, a fiscal year start and end date is used as the alternative to appointment start and end dates for some SEP members. As a result, the Members list, including the number of chairs, may not align or directly match to specific meeting dates. Meeting rosters, including members' affiliations and zip codes are available online at <https://public.era.nih.gov/pubroster/>.

Narrative Description

NIH's mission is to seek fundamental knowledge about the nature and behavior of living systems and the application of that knowledge to enhance health, lengthen life, and reduce illness and disability. NIH works toward that mission by supporting the research of non-Federal scientists in universities, medical schools, hospitals, and research institutions throughout the country and abroad. The National Institute on Drug Abuse Special Emphasis Panel performs a vital function of determining the quality of scientific proposals. This evaluation serves as the basis for making funding decisions in NIDA. The Committee is meeting its mission by providing high-quality, unbiased, and timely scientific reviews in the area of drug abuse. Section 492 of the PHS Act states that The Secretary ...shall by regulation require appropriate technical and scientific peer review of (A) applications...; and (B) biomedical and behavioral research and development contracts..."

Cost Savings Comments

NIH supported basic and clinical research accomplishments often take many years to unfold into new diagnostic tests and new ways to treat and prevent diseases. Also, there are no comparable alternative mechanisms to determine cost savings accrued using the current committee structure.

Action Comments

An action of approved or recommended for grants receiving initial peer review by this committee does not infer that the grant will be or has been funded. Research grant applications submitted to NIH must go through a two-step review process that includes the initial peer review for scientific and technical merit and a second step of review and approval by a National Advisory Council for program relevance. In addition, prior to an award or funding being made, NIH staff must conduct an administrative review for a number of other considerations. These include alignment with NIH's funding principles, review of the project budget, assessment of the applicant's management systems, determination of applicant eligibility, and compliance with public policy requirements. After all these steps have been completed, NIH officials make funding decisions on individual grant applications.
