20a. How does the Committee accomplish its purpose?

This committee is composed of highly qualified scientists with expertise related to the Institute's HIV/AIDS research efforts. It provides a breadth and balance of specialized knowledge necessary to assess the long-range goals, program concepts, research opportunities, and direction of ongoing research and future plans, including HIV

pathogenesis, epidemiology, vaccine, prevention and treatment research.

20b. How does the Committee balance its membership?

The AIDS Research Advisory Committee, NIAID has 16 members as follows: Up to 13 voting members with medical and scientific expertise and community perspective appropriate to the Committee's charge and will include physicians whose clinical practice includes a significant number of patients with AIDS and 3 non-voting ex officio members. Some committee members also have experience/expertise in international HIV research, which is critical given the global nature of NIAID's research agenda. Community/public representatives are also on the committee. The 3 non-voting ex officio members of this Committee may include: one employee from the Centers for Disease Control and Prevention, National Center for HIV/AIDS, Viral Hepatitis, STD, and TB Prevention to be selected by that organization; a National Institutes of Health (NIH) intramural scientist engaged in clinical research; and the Director, Office of AIDS Research, NIH. Each ex officio member will also be a physician with a clinical practice that includes a significant number of patients with AIDS. A member of the Office of AIDS Research Advisory Council, NIH will also attend and act as liaison representative to ensure adequate communication on critical issues of concern to both advisory Committees.

20c. How frequent and relevant are the Committee Meetings?

The committee met three times during this reporting period and provided valuable advice to the Division of AIDS (DAIDS), evaluating current activities and reviewing plans for future research

projects. The committee also reviewed and approved numerous concepts for new initiatives proposed by DAIDS staff.

20d. Why can't the advice or information this committee provides be obtained elsewhere?

This committee is composed of recognized experts in biomedical and/or behavioral research who represent the forefront of research and technical knowledge and public member(s) representing those with HIV infection and/or AIDS. Their recommendations cannot be obtained from other sources because the complex nature of research requires a specialized balance and breadth of objective expertise not otherwise available.

20e. Why is it necessary to close and/or partially closed committee meetings?

N/A

21. Remarks

Reports: This committee did not produce any public reports during the fiscal year. The DFO and Decision Maker positions are held by the same individual because of the way the Institute assigns duties and has delegated authority. The Charter allows the Committee to have 16 authorized members including but not limited to SGEs and Ex-Officios. There are three current Ex-Officios named in the Charter (Diana Finzi, Henry Masur, and Robyn Neblett Fanfair), which equals to the total of 16 Max number of members. Elaine Abrams served as Acting Chair.

Narrative Description

NIH's mission is to seek fundamental knowledge about the nature and behavior of living systems and the application of that knowledge to enhance health, lengthen life, and reduce illness and disability. NIH works toward that mission by fostering research projects relating to AIDS in order that research in this area world-wide will continue to find new solutions to the treatment and

future cure of AIDS.
