20a. How does the Committee accomplish its purpose?

This committee was composed of recognized biomedical and/or behavioral research authorities who represented the forefront of research and technical knowledge and who provided first-level merit review of funding applications and proposals, including but not limited to grant and cooperative agreement applications and contract proposals, for research projects and for research and training activities in areas relevant to clinical, basic, behavioral, and social sciences related to aging. During this reporting period the committee reviewed 1,575 applications requesting \$5,190,033,113.00.

20b. How does the Committee balance its membership?

Members of the committee were authorities knowledgeable in the various disciplines and fields relating to clinical, basic, behavioral, and social sciences related to aging.

20c. How frequent and relevant are the Committee Meetings?

The committee held 72 meetings during this reporting period.

20d. Why can't the advice or information this committee provides be obtained elsewhere?

This committee was composed of recognized biomedical and behavioral research authorities

who represented the forefront of research and technical knowledge and who provided first-level merit review of funding applications and proposals, including but not limited to grant and cooperative agreement applications and contract proposals, for research projects and for research and training activities. These evaluations and recommendations could not be obtained from other sources because the specialized, complex nature of the applications and proposals required a unique balance and breadth of expertise not available on the NIH staff or from other established sources.

20e. Why is it necessary to close and/or partially closed committee meetings?

The meetings of the committee were closed to the public for the review of grant applications. Sections 552b(c)(4) and 552b(c)(6) of the Government in the Sunshine Act permit the closing of meetings where discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information, the disclosure of which would constitute a clearly unwarranted invasion of personal property.

21. Remarks

Per "2025 Secretary Directive" this FACA Committee has been terminated. Reports: This committee did not produce any public reports during the fiscal year. DFO/Committee Decision Maker: The positions of Committee Decision Maker and DFO were held by the same individual based on delegations of authority and assigned duties in this Institute. URL: This committee did not maintain a dedicated website. The members of this Special Emphasis Panel (SEP) did not have standing appointments and served on an as

needed basis for meetings throughout the fiscal year. Therefore, the members list does not reflect appointment start and end dates. As often as possible, instead of appointment start and end dates, each meeting date on which the SEP member served is identified on the Members list. When necessary to protect peer review integrity, a fiscal year start and end date is used as the alternative to appointment start and end dates for some SEP members. As a result, the Members list, including the number of chairs, may not align or directly match to specific meeting dates. Meeting rosters, including members' affiliations and zip codes are available online at <https://public.era.nih.gov/pubroster/>.

Narrative Description

NIH's mission is to seek fundamental knowledge about the nature

and behavior of living systems and the application of that knowledge to enhance health, lengthen life, and reduce illness and disability. NIH works toward that mission by: conducting research in its own laboratories; supporting the research of non-Federal scientists in universities, medical schools, hospitals, and research institutions throughout the country and abroad; helping in the training of research investigators; and fostering communication of medical and health sciences information. Section 492 of the PHS Act states that The Secretary...shall by regulation require appropriate technical and scientific peer review of - (A) applications...; and (B) biomedical and behavioral research and development contracts...

NIH Peer Review Committees were involved in the initial review of research grant applications. The NIH dual peer review system is mandated by statute in accordance with section 492 of the Public Health Service Act. The charge to this committee was to determine scientific and technical merit of the individual grants or contracts. These recommendations were forwarded to Federal officials who generally accepted the committee's recommendations and favorable applications are then forwarded for the second level of review performed by Institute and Center (IC) National Advisory Councils or Boards. Only applications that were favorably recommended by both the initial peer review committee and the Advisory Council may be recommended for funding.

What is the approximate Percentage of these recommendations that have been or will be Partially implemented by the agency?

Action Comments

An action of approved or recommended for grants receiving review by this council does not infer that the grant will be or has been funded. Research grant applications submitted to NIH must go through a two-step review process that includes initial peer review for scientific and technical merit and a second step of review for a number of other considerations. These include alignment with NIH's funding principles, review of the project budget, assessment of the applicant's management systems, determination of applicant eligibility, and compliance with public policy requirements. After all of these steps have been completed, NIH officials make funding decisions on individual grant applications.
