20a. How does the Committee accomplish its purpose?

The Committee provided advice to the Commissioner of Food and Drugs and to other appropriate officials on emerging food safety, food science, and nutrition issues. In addition, the committee recommended ways of communicating to the public potential risks associated with these issues and approaches that may be considered in addressing the risks.

20b. How does the Committee balance its membership?

The Committee included a wide range of scientific and technical expertise drawn from different geographical locations throughout the country and strives to include minority and female

representation. The committee also included technically qualified members who are identified with consumer interests and non-voting representatives who are identified with industry interests.

20c. How frequent and relevant are the Committee Meetings?

The committee met only five times in the last nine years.

20d. Why can't the advice or information this committee provides be obtained elsewhere?

Members of the Committee were drawn from academia, research organizations, state health departments and clinical practice. Their advice and input lends credibility to FDA's regulatory decisions. The alternate means of obtaining this advice would involve the recruitment of a large number of scientists on a full-time basis at maximum rates of compensation.

20e. Why is it necessary to close and/or partially closed committee meetings?

There were no closed meetings to report in FY18.

21. Remarks

In view of the declining number of issues for which the FAC is determined to provide the most appropriate input to the Center, and the infrequent meetings held by this Committee, it was deemed that the effort and expense of maintaining this advisory committee is no longer justified. In recent years, the FAC has been convened solely to advise FDA on food safety policies, with other mechanisms being used to provide input into the Center on topics such as nutrition. Its most recent meeting in December 2015, discussed FDA's

policies related to the presence of *Listeria monocytogenes* in foods. CFSAN has determined that any relevant FAC issues in the future can be addressed by the Agency's other advisory committees, such as the FDA Science Board and the FDA's Risk Communication Advisory Committee (RCAC), with additional augmentation of expertise by appropriate subject-matter experts serving as temporary members of those committees. In addition, CFSAN will continue to hold public meetings, webinars, workshops, and conferences to engage with stakeholders. The existing members of the FAC will be retired as special government employees. The committee was terminated on December 12, 2017. The committee had no expenditures this year and less than 10% of a staff year was dedicated to terminating it in December 2017.

Designated Federal Officer

Karen L Strambler DFO

Committee Members	Start	End	Occupation	Member Designation
Bruner, Leon	07/01/2015	12/12/2017	The Grocery Manufacturers Association	Representative Member

Number of Committee Members Listed: 11

Narrative Description

FDA's strategic priorities in responding to the public health challenges of the 21st century are to advance regulatory science and innovation; strengthen the safety and integrity of the global supply chain; strengthen compliance and enforcement activities to support public health; expand efforts to meet the needs of special populations; advance medical countermeasures and emergency preparedness; advance food safety and nutrition; promote public health by advancing the safety and effectiveness of medical products; establish an effective tobacco regulation, prevention, and control program; and manage for organizational excellence and accountability. The Food Advisory Committee supports FDA's

strategic priorities by providing advice to the Commissioner of Food and Drugs on food safety and nutrition issues. In addition, the committee recommends ways of communicating to the public potential risks and benefits associated with various issues and recommends different approaches that may be considered in addressing potential risks.

What are the most significant program outcomes associated with this committee?

Checked if
Applies

Improvements to health or safety	<input checked="" type="checkbox"/>
Trust in government	<input checked="" type="checkbox"/>
Major policy changes	<input checked="" type="checkbox"/>
Advance in scientific research	<input checked="" type="checkbox"/>
Effective grant making	<input type="checkbox"/>
Improved service delivery	<input type="checkbox"/>
Increased customer satisfaction	<input checked="" type="checkbox"/>
Implementation of laws or regulatory requirements	<input checked="" type="checkbox"/>
Other	<input type="checkbox"/>

Outcome Comments

\$1,000,001 - \$5,000,000	<input type="checkbox"/>
\$5,000,001 - \$10,000,000	<input type="checkbox"/>
Over \$10,000,000	<input type="checkbox"/>
Cost Savings Other	<input type="checkbox"/>

Cost Savings Comments

The utilization of the Food Advisory Committee enabled the Agency to obtain required and frequently scarce professional services from medical and scientific experts not otherwise available to the Agency; and to obtain the services of these experts only on an as needed basis rather than on a full-time basis. The service of the Committee resulted in advice for the improvement of the public health, for which it is difficult to assign a financial value.

What is the approximate Number of recommendations produced by this committee for the life of the committee?

26

Number of Recommendations Comments

The committee made 26 recommendations from FY-03 through FY-18.

What is the approximate Percentage of these recommendations that have been or will be Fully implemented by the agency?

80%

% of Recommendations Fully Implemented Comments

The function of an advisory committee is purely advisory in nature. Although, the FDA often accepts the recommendations from its committees, the Agency has the option of not implementing the advice.

What is the approximate Percentage of these recommendations that have been or will be Partially implemented by the agency?

10%

% of Recommendations Partially Implemented Comments

The function of an advisory committee is purely advisory in nature. Although, the FDA often accepts the recommendations from its committees, the Agency has the option of not implementing the advice.

Does the agency provide the committee with feedback regarding actions taken to implement recommendations or advice offered?

Yes ☒ No ☐ Not Applicable ☐

Agency Feedback Comments

The DFO provides quarterly notices to members and directs them to updates on the web, press releases, and communications from OC.

What other actions has the agency taken as a result of the committee's advice or recommendation?

Checked if Applies

- | | |
|-----------------------------------|-------------------------------------|
| Reorganized Priorities | <input checked="" type="checkbox"/> |
| Reallocated resources | <input type="checkbox"/> |
| Issued new regulation | <input checked="" type="checkbox"/> |
