Narrative Description

The Advisory Committee for Injury Prevention and Control was designed to advise and make recommendations to CDC regarding feasible goals for prevention and control of injury, policies, strategies, objectives, priorities, and progress toward injury prevention and control. The Committee provides advice on the appropriate balance of intramural and extramural research, guidance on the needs, structure, progress and performance of intramural programs, guidance on extramural scientific program matters, and second-level scientific and programmatic review of applications for research grants, cooperative agreements, and training grants related to injury control and violence prevention, recommending approval of projects that merit further consideration for funding support. The Committee was to recommend areas of research to be supported by contracts and

cooperative agreements and provides concept review of program proposals and announcements.
