19. Federal Staff Support Years (FTE)	0.00	0.00

20a. How does the Committee accomplish its purpose?

The Medical Devices Advisory Committee provides advice to FDA on the safety and effectiveness of marketed and investigational devices, the classification of devices into one of three regulatory categories, the possible risks to health associated with the use of devices, the formulation of product development protocols, the review of premarket approval applications, and the content of guidelines or guidance documents designed to improve the interaction between the Agency and sponsors of medical devices. This committee consists of 18 advisory panels: 17 are divided according to medical specialties and one is a dispute resolution panel. In FY 2024, 7 meetings were held.

20b. How does the Committee balance its membership?

Members are drawn from the nation's top academicians, clinicians and researchers and they provide expertise in a full range of medical specialties. These medical specialties include anesthesiology, cardiac catheterization and electrophysiology, cardiology, cardiothoracic and vascular surgery, radiation physics, radiotherapy, mammography radiology, biomaterials, cytopathology, molecular genetics, clinical toxicology, chemical engineering, orthopaedic surgery, biostatistics, gastroenterology, nephrology, esophageal disorders, trauma, burn and wound plastic surgery, surgical oncology, reconstructive plastic surgery, periodontology, biochemistry, immunology, oral and maxillofacial surgery, vision sciences, corneal disease, ophthalmological surgery, perinatology, reproductive endocrinology, obstetrics and gynecology, neurology, cerebrovascular surgery, interventional neuroradiology, neurological surgery, neurological disorders and stroke, and pediatric surgery. There is at least one consumer and industry representative per panel and while they do not vote, they do provide viewpoints from their respective constituencies. Qualified individuals of all genders and racial groups are encouraged to apply for vacancies.

20c. How frequent and relevant are the Committee Meetings?

The Committee had seven meetings in FY 2024 and tentatively plans 10 meetings for the coming year to address new technologies coming to market and to address questions that may arise about existing technologies and classification issues. The scope and depth of expertise that

Committee members possess is not always available within the Agency; therefore, the Panel meetings provide a source of expert advice to the Agency on premarket review decisions, postmarket issues, classification and reclassification decisions, early discussion of study designs, and guidance documents. During FY 2024, the Panels convened to discuss, make recommendations and vote on the following two premarket approval applications (PMAs) : (1) Abbott Medical TriClip G4 System, indicated for the improvement of health status in patients with symptomatic severe tricuspid regurgitation (TR) despite being treated optimally with medical therapy, who are at intermediate or greater risk for surgery and in whom tricuspid valve edge-to-edge repair is appropriate as determined by a heart team; and (2) Shield test by Guardant Health, Inc. The Shield test is a qualitative, in vitro diagnostic test intended to detect colorectal cancer derived alterations in cell-free DNA from blood collected in the Guardant Shield Blood Collection Kit. Shield is indicated for colorectal cancer screening in individuals at average risk for the disease, age 45 years or old. The Panel also heard presentations from Balance Ophthalmics and the FDA and discussed, made recommendations, and answered questions on the information related to the de novo application for the FSYX Ocular Pressure Adjusting Pump System developed by Balance Ophthalmics. The device is indicated for the reduction of Intraocular Pressure (IOP) during sleep in adult patients with open-angle glaucoma and IOP ≥ 21 mmHg who are currently using or have undergone another IOP-lowering treatment. The Panel also met to discuss and make recommendations on the design of multi-cancer detection (MCD) in vitro diagnostic devices (tests) as well as potential study designs and study

outcomes of interest that could inform the assessment of the probable benefits and risks of MCD screening tests. The Panel also discussed an approach to improve the quality of premarket studies and associated methods used to evaluate the performance of pulse oximeters submitted for premarket review, taking into consideration a patient's skin pigmentation, and patient-reported race and ethnicity. The Panel discussed and made recommendations on the classification of blood irradiators for the prevention of metastasis, which are currently unclassified pre-amendment devices. This included a discussion of the known risks, safety/effectiveness concerns, and a general classification recommendation for the device. Additionally, at the only in-person meeting, the Panel met to discuss and make recommendations on medical device supply chain resiliency and shortage issues, including the proposed 506J Device List which was developed as a requirement of section 2514 of the Consolidated Appropriations Act, 2023 ("Fiscal Year (FY) 2023 Omnibus"). The Panel also discussed how the 506J Device List relates to medical devices used in pandemic preparedness and response to satisfy, in part, a requirement under section 3302 of the FY 2023 Omnibus.

20d. Why can't the advice or information this committee provides be obtained elsewhere?

Committee members are selected from academia, research, and/or clinical practice. The advice they provide helps decisions stand up under public scrutiny and offers credibility to the regulatory process. The goals of the committee can only be met using these alternate means to obtain sound advice.

20e. Why is it necessary to close and/or

partially closed committee meetings?

N/A

21. Remarks

The Panels of this Committee meet as needed, rather than on a regular basis; therefore, some Panels did not meet during FY 2024 and have no reporting requirements. For the Panels that did not meet, considerable time was also devoted to reappointing current members, maintaining associated records for these activities, and streamlining processes within FDA. In addition, time was spent in the routine care and maintenance of the committee: the development of a financial report for this website; updating the roster and number of vacancies on our website; completing the annual ethics report; reviewing financial disclosures of current members and nominees and providing ethics training.

Designated Federal Officer

James P. Swink Lead Public Health Analyst,
Center for Devices and Radiological Health/FDA

Committee Members	Start	End	Occupation	Member Designation
Al-Aswad, Lama	04/29/2019	10/31/2024	Professor of Ophthalmology and Vice Chair of Innovations, New York Univ. Langone Eye Center, New York, NY	Special Government Employee (SGE) Member
Alam, Murad	04/23/2022	08/31/2025	Vice-Chair, Department of Dermatology, Northwestern University, Chicago, IL	Special Government Employee (SGE) Member

Zuley, Margarita	04/23/2022	01/31/2025	Professor of Radiology, Vice Chair, Quality and Strategic Development, Division Chief, Breast Imaging, Department of Radiology, University of Pittsburgh Medical Center, Pittsburgh, PA	Special Government Employee (SGE) Member

Number of Committee Members Listed: 119

Narrative Description

FDA's strategic priorities in responding to the public health challenges of the 21st century are to advance regulatory science and innovation; strengthen the safety and integrity of the global supply chain; strengthen compliance and enforcement activities to support public health; expand efforts to meet the needs of special populations; advance medical countermeasures and emergency preparedness; advance food safety and nutrition; promote public health by advancing the safety and effectiveness of medical products; establish an effective tobacco regulation, prevention, and control program; and manage for organizational excellence and accountability. The Panels (of the Medical Devices Advisory

Committee (MDAC)) of the Center for Devices and Radiological Health (CDRH) Advisory Committee organized under 513(b) of the Federal Food, Drug and Cosmetic Act supports the FDA mission and strategic plan by providing independent expert scientific advice on the safety and efficacy of medical devices and radiation emitting products. The Panels also offer an opportunity for public input on all the issues that attend the introduction of new medical devices.

What are the most significant program outcomes associated with this committee?

Checked if
Applies

Improvements to health or safety	<input checked="" type="checkbox"/>
Trust in government	<input checked="" type="checkbox"/>
Major policy changes	<input checked="" type="checkbox"/>
Advance in scientific research	<input checked="" type="checkbox"/>
Effective grant making	<input type="checkbox"/>
Improved service delivery	<input type="checkbox"/>
Increased customer satisfaction	<input checked="" type="checkbox"/>
Implementation of laws or regulatory requirements	<input checked="" type="checkbox"/>
Other	<input type="checkbox"/>

Outcome Comments

NA

What are the cost savings associated with this committee?

Checked if Applies

None	<input type="checkbox"/>
Unable to Determine	<input checked="" type="checkbox"/>
Under \$100,000	<input type="checkbox"/>
\$100,000 - \$500,000	<input type="checkbox"/>
\$500,001 - \$1,000,000	<input type="checkbox"/>
\$1,000,001 - \$5,000,000	<input type="checkbox"/>
\$5,000,001 - \$10,000,000	<input type="checkbox"/>
Over \$10,000,000	<input type="checkbox"/>
Cost Savings Other	<input type="checkbox"/>

Cost Savings Comments

The utilization of Medical Devices Advisory Committee enables the Agency to obtain required and frequently scarce professional services from medical and scientific experts not otherwise available to the Agency; and to obtain the services of these experts only on an as needed basis rather than on a full-time basis. The services of the Committee resulted in advice for the improvement of the public health for which it is difficult to assign a financial value.

What is the approximate Number of recommendations produced by this committee for the life of the committee?

366

Number of Recommendations Comments

The Committee made 366 recommendations from FY03 through FY24.

What is the approximate Percentage of these recommendations that have been or will be Fully implemented by the agency?

85%

% of Recommendations Fully Implemented Comments

The function of an advisory committee is purely advisory in nature. Although the FDA most often accepts the recommendations from its committees, the advice is purely advisory in nature, and therefore, the Agency has the option of not implementing the advice.

What is the approximate Percentage of these recommendations that have been or will be Partially implemented by the agency?

10%

% of Recommendations Partially Implemented Comments

The function of an advisory committee is purely advisory in nature. Although the FDA most often accepts the recommendations from its committees, the advice is purely advisory in nature, and therefore, the Agency has the option of not implementing the advice. This number represents an approximation of the percentage of recommendations that the agency has fully implemented or plans to fully implement.

Does the agency provide the committee with feedback regarding actions taken to implement recommendations or advice offered?

Yes ☒ No ☐ Not Applicable ☐

Agency Feedback Comments

When appropriate, information is made available to the public. Actions related to guidance documents or other general matters issues are available publicly when implemented.

What other actions has the agency taken as a result of the committee's advice or recommendation?

Checked if Applies

Reorganized Priorities	<input checked="" type="checkbox"/>
Reallocated resources	<input type="checkbox"/>
Issued new regulation	<input checked="" type="checkbox"/>
Proposed legislation	<input type="checkbox"/>
Approved grants or other payments	<input type="checkbox"/>
Other	<input checked="" type="checkbox"/>

Action Comments

FDA approves or chooses not to approve an investigational new medical product or other regulatory decision-making.

Is the Committee engaged in the review of applications for grants?

No

Grant Review Comments

NA
