20a. How does the Committee accomplish its purpose?

Section 492 of the PHS Act states that The Secretary...shall by regulation require appropriate technical and scientific peer review of 18 (A) applications...; and (B) biomedical and behavioral research and development contracts. This committee is composed of recognized biomedical and behavioral research authorities who represent the forefront of research and technical knowledge and who provide first-level merit review of highly scientific and technical research grant applications and/or contract proposals in the fields related to biomedical imaging technology, bioengineering, technology and surgical sciences, clinical molecular imaging and probe development, medical imaging and surgery, anesthesiology and trauma. During this reporting period, the committee reviewed 1,661 applications requesting $3,396,989,499.00

20b. How does the Committee balance its membership?

The members of this committee are authorities knowledgeable in the fields relating to biomedical imaging technology, bioengineering, technology

and surgical sciences, clinical molecular imaging and probe development, medical imaging and surgery, anesthesiology and trauma.

20c. How frequent and relevant are the Committee Meetings?

The committee held 21 meetings during this reporting period.

20d. Why can't the advice or information this committee provides be obtained elsewhere?

This committee is composed of recognized biomedical and/or behavioral research authorities who represent the forefront of research and technical knowledge and who provide first-level merit review of highly scientific and technical research grant and cooperative agreement applications and contract proposals. These evaluations and recommendations can not be obtained from other sources because the specialized, complex nature of the applications and proposals requires a unique balance and breadth of expertise not available on the NIH staff or from other established sources.

20e. Why is it necessary to close and/or partially closed committee meetings?

The meetings of the committee were closed to the public for the review of grant applications. Sections 552b(c)(4) and 552b(c)(6) of the Government in the Sunshine Act permit the closing of meetings where discussion could reveal confidential trade secrets or commercial property such as patentable material and personal information, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

21. Remarks

Temporary members are individuals recruited based on expertise needed for each meeting. Some temporary members may attend one meeting only while others may attend multiple meetings. Instead of appointment start and end dates, each meeting date on which the temporary member served is identified on the Members list. Meeting rosters, including members' affiliations and zip codes are available online at https://public.era.nih.gov/pubroster/. Individual meeting minutes may disclose trade secrets and/or commercial or financial information obtained from a person and considered privileged or confidential. Individual meeting minutes may be requested by contacting the CSR committee management staff who will coordinate with NIH's FOIA office to determine what information may be released. This committee did not produce any public reports during the fiscal year. The committee's role was to conduct the initial scientific and technical peer review of grant applications. All committee meetings were closed to the public pursuant to sections 552b(c)(4) and 552b(c)(6) of Title 5 U.S.C., as amended, due to the sensitive nature of the materials discussed. The grant applications and related discussions involved confidential trade secrets, commercial property, including patentable material and personal information about individuals associated with the grant applications. Disclosure of this information would represent a clear and unwarranted invasion of personal privacy. Information resulting from these closed initial peer review meetings is subject to the Freedom of Information Act. Research grant applications submitted to NIH undergo a second review and approval by a National Advisory Council for program relevance. Prior to an award being made, NIH staff conduct administrative review for other

considerations including alignment with NIH funding principles. For those interested in learning more about research projects funded by the NIH, comprehensive details can be accessed via the Research Portfolio Online Reporting Tool (RePORT) at http://report.nih.gov. The following members' terms ended early: Edward Cantu (5/12/2026), Hugh Hemmings (1/29/2026), Melanie Scott (8/4/2026), Tracy Toliver-Kinsky (7/22/2026), Luis Ulloa (7/14/2026). Drs. Lida Hariri and Peter Scott were reappointed to the role of chairperson through 6/30/2028. Dr. Scott Lemaire was reassigned to the role of chairperson during the fiscal year. Due to the assignment of responsibilities within the Center, the roles of the committee designated federal official and committee decision maker are filled by the same individual. On the 2025 ACR, Dr. Stella Kang was incorrectly reported as separating from the committee on 11/30/2024. Her correct appointment dates (7/1/2022-6/30/2028) are included on this year's report.

Narrative Description

NIH's mission is to seek fundamental knowledge about the nature and behavior of living systems and the application of that knowledge to enhance health, lengthen life, and reduce illness and disability. NIH works toward that mission by supporting the research of non-Federal scientists in universities, medical schools, hospitals, and research institutions throughout the country and abroad. Section 492 of the PHS Act states that The Secretary ...shall by regulation require appropriate technical and scientific peer review of - (A) applications...; and (B) biomedical and behavioral research and development contracts...

The mission of the Center for Scientific Review is to provide the funding Institutes and Centers of NIH with the scientific and technical merit of research grant applications submitted to the NIH. It is these Institutes or Centers and their advisory councils that make funding decisions.NIH Peer Review Committees are involved in the initial review of research grant applications. The NIH dual peer review system is mandated by statute in

accordance with section 492 of the Public Health Service Act. The charge to this committee is to determine scientific and technical merit of the individual grants or contracts. These recommendations are forwarded to Federal officials who generally accept the committee's recommendations and favorable applications are then forwarded for the second level of review performed by Institute and Center (IC) National Advisory Councils or Boards. Only applications that are favorably recommended by both the initial peer review committee and the Advisory Council may be funded.

Action Comments

An action of “approved” or “recommended” for grants receiving initial peer review by this committee does not infer that the grant will be or has been funded. Research grant applications submitted to NIH must go through a two-step review process that includes the initial peer review for scientific and technical merit and a second step of review and approval by a National Advisory Council for program relevance. In addition, prior to an award or funding being made, NIH staff must conduct an administrative review for a number of other considerations. These include alignment with NIH’s funding principles, review of the project budget, assessment of the applicant’s management systems, determination of applicant eligibility, and compliance with public policy requirements. After all these steps have been completed, NIH officials make funding decisions on individual grant applications.

Is the Committee engaged in the review of applications for grants?
