20a. How does the Committee accomplish its purpose?

To provide advice on potential future research priorities, the committee organizes itself into working groups to deal with various issues, such as, human resources and diversity, the future of high-speed networking, and other specific matters. All play a role in helping CISE and NSF define a research agenda, and meet the needs for an informed citizenry, priorities for support of the nation's advanced computational and communications structure, and developing a future cadre of scientists and engineers. It reviews performance in proposal processing and substance through review of CISE's committee of visitors (COV) reports and management responses to same.

20b. How does the Committee balance its membership?

The Committee is diverse and includes individuals covering all scientific and technical fields falling under CISE. Its membership draws from the academic and industrial communities and represents researchers, creators of technology, and users. Several members have interests and expertise in human resource issues which are particularly important in this new and rapidly evolving field.

20c. How frequent and relevant are the Committee Meetings?

Meetings usually are held twice yearly and are scheduled to develop advice closely related to the annual budget and long-range planning processes. The Committee's discussions help clarify major emerging research themes for CISE areas and contribute to priority setting. These are

recurring responsibilities which require continual community evaluation and updating.

20d. Why can't the advice or information this committee provides be obtained elsewhere?

The Committee has been constituted to reflect the broad range of stakeholders involved. No other balanced forum exists to bring the disparate and complementary viewpoints together for presentation, criticism and synthesis.

20e. Why is it necessary to close and/or partially closed committee meetings?

N/A

21. Remarks

Advisory Committee for Computer and Information Science and Engineering terminated on April 15, 2025, per NSF Staff Memorandum OD 25-26 pursuant to E.O. 14217, Commencing the Reduction of the Federal Bureaucracy, Section 2(g).

Narrative Description

The NSF mission is set out in the NSF Act of 1950 and authorizes and directs the Agency to initiate and support: basic scientific research and research fundamental to the engineering process; and science and engineering education programs at all levels and in all fields of science and engineering. The CISE Advisory Committee provides expert advice to NSF on emerging science and engineering opportunities and serves as a sounding board for new scientific priorities identified within the agency.

What are the most significant program outcomes associated with this committee?

Checked if Applies

- Improvements to health or safety
- Trust in government
- Major policy changes
- Advance in scientific research

- Effective grant making
- Improved service delivery
- Increased customer satisfaction
- Implementation of laws or regulatory requirements

Cost Savings Comments

The cost of obtaining the expertise, insight, and information provided by the CISE Advisory Committee using alternative methods, such as hiring AC members as full or part-time employees, would obviously be higher.

What is the approximate Number of recommendations produced by this committee for the life of the committee?

13

Number of Recommendations Comments

Committee terminated 15- April 2025

What is the approximate Percentage of these recommendations that have been or will be Fully implemented by the agency?

0%

% of Recommendations Fully Implemented Comments

All recommendations are considered by the agency.

What is the approximate Percentage of these recommendations that have been or will be Partially implemented by the agency?
