20a. How does the Committee accomplish its purpose?

NIH's mission is to seek fundamental knowledge about the nature and behavior of living systems and the application of that knowledge to enhance health, lengthen life, and reduce illness and disability. NIH works toward that mission by conducting research in its own laboratories.

Section 402 (b)(9) of the Public Health Service Act states that "the Director, NIH...shall assure that research at...the National Institutes of Health is subject to review in accordance with section 492." Section 492(b) states that the "Director of NIH shall establish procedures for periodic technical

and scientific peer review of research at the National Institutes of Health." This Board assesses the quality of the Institute's intramural research programs and evaluates the productivity and performance of investigators, necessary functions for the operation of a highly effective intramural research program and shall also, as requested by the Director, NIH, undertake peer review of extramural funding applications as required by section 492 of the Public Health Service Act, as amended. The board is composed entirely of scientific and technical experts. The Board of Scientific Counselors reviews all tenure and tenured-track intramural scientists at NHGRI.

20b. How does the Committee balance its membership?

The Board of Scientific Counselors consists of nine members, including the Chair. The Chair and members are selected by the Director, NIH, from authorities knowledgeable in the fields of genomics, medical genetics, human and mammalian genetics, cancer biology, molecular biology, developmental biology, biochemistry, chemical genomics and translational research, bioinformatics, and social and behavioral research.

20c. How frequent and relevant are the Committee Meetings?

The Board of Scientific Counselors meets approximately two times a year to advise the Director, NIH; the Deputy Director for Intramural Research, NIH; the Director, NHGRI; and the Scientific Director, NHGRI, concerning the Institute's intramural research programs and through periodic visits to assess the research in progress, the proposed research, and the productivity and performance of NHGRI scientists.

The Board conducted one meeting on 11/16/2022-11/17/2022 and made 4 recommendations.

20d. Why can't the advice or information this committee provides be obtained elsewhere?

The Board of Scientific Counselors is composed of scientific members who provide peer review, advise on policy development, program implementation and development, and identify research needs and opportunities for the Intramural Program of the National Human Genome Research Institute. The quality, scope, and balance of advice from this board cannot be obtained from NIH staff or from other established sources because the membership of the board is constituted to meet the specific requirements of the mandated mission of the board and the National Human Genome Research Institute.

20e. Why is it necessary to close and/or partially closed committee meetings?

The meeting of the Board of Scientific Counselors was closed to the public for the review of the laboratories of the Intramural Program of the National Human Genome Research Institute. Section 552b(c)(6) of the Government in the Sunshine Act permit the closing of meetings where discussion could reveal personal information, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

21. Remarks

Committee Function: Other - Scientific and Technical Peer Review. Reports: This committee did not produce any public reports during the fiscal year. The DFO and Decision Maker are the same person, the Scientific Director, National Human

Genome Research Institute. The Board makes recommendations on intramural lab and confidential personnel matters and federal staff involvement is kept at a minimum. Dr. Mildred Cho was omitted from the 2022 report. Her term dates are 8/28/2022 - 6/30/2027. Meetings were held virtually in FY23 due to the on-going COVID-19 pandemic.

Narrative Description

The goal of NIH research is to acquire new knowledge to help prevent, detect, diagnose, and treat disease and disability, for the

rarest genetic disorder to the common cold. The NIH mission is to uncover new knowledge that will lead to better health for everyone. NIH works toward that mission by conducting research in its own laboratories. Section 402 (b)(9) of the Public Health Service Act states that "the Director, NIH...shall assure that research at...the National Institutes of Health is subject to review in accordance with section 492." Section 492(b) states that the "Director of NIH shall establish procedures for periodic technical and scientific peer review of research at the National Institutes of Health ." This Board assesses the quality of the Institute's intramural research programs and evaluates the productivity and performance of investigators, necessary functions for the operation of a highly effective intramural research program and shall also, as requested by the Director, NIH, undertake peer review of extramural funding applications as required by section 492 of the Public Health Service Act.

Action Comments

The Scientific Director and other NIH officials use the recommendations made by the BSC in evaluating the quality of the intramural research programs including scientific priorities and resources available. No changes were made to existing laboratory research priorities or resources

Is the Committee engaged in the review of applications for grants?

Grant Review Comments

Although grant reviews are included in the duties of this Board, there were no grant reviews performed during this fiscal year.
