20a. How does the Committee accomplish its purpose?

This committee was composed of recognized biomedical and/or behavioral research authorities who represent the forefront of research and technical knowledge and who provide first-level merit review of highly scientific and technical research grant application and/or contract proposals in the fields of biomedical research and behavioral science related to the causes, consequences, prevention, diagnosis, and treatment of alcohol abuse and alcoholism. The committee reviewed 274 grants requesting \$182,033,003.

20b. How does the Committee balance its membership?

The reviewers for each meeting are selected to evaluate funding applications and proposals, including but not limited to grant and cooperative agreement applications and contract proposals, for research projects and for research and training activities. Participants for each meeting were assembled to most efficiently and effectively cover the number and breadth of applications or contracts requiring review. The members designated to serve on this committee are authorities knowledgeable in the fields relevant to alcohol abuse and alcoholism in the areas of biomedical, basic and clinical neuroscience, basic behavioral science, treatment, health services, epidemiology, prevention, human development and AIDS.

20c. How frequent and relevant are the Committee Meetings?

The committee held 11 FACA meetings during this reporting period. Members also participated in other activities on the following dates:

Workgroups: 3/9/2025, 3/28/2025, 4/2/2025, 4/9/2025, 4/15/2025, 4/22/2025, 4/30/2025, 5/1/2025, 5/15/2025, 5/19/2025, 5/20/2025, 5/20/2025, 5/27/2025. These meetings supported the designated mission and the responsibilities of the Institute.

20d. Why can't the advice or information this committee provides be obtained elsewhere?

This committee was composed of recognized biomedical and/or behavioral research authorities who represent the forefront of research and technical knowledge and who provide first-level merit review of highly scientific and technical funding applications and proposals, including but not limited to grant and cooperative agreement applications and contract proposals, for research projects and for research and training activities. These evaluations and recommendations cannot be obtained from other sources because the specialized, complex nature of the applications and contract proposals requires a unique balance and breadth of expertise not available on the NIH staff or from other established sources.

20e. Why is it necessary to close and/or partially closed committee meetings?

The meetings of the committee were closed to the public for the review of grant applications and/or contract proposals. Sections 552(c)(4) and 552b(c)(6) of the Government in the Sunshine Act permit the closing of meetings where discussion could reveal confidential trade secrets or commercial property such as patentable materials and personal information, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

21. Remarks

Per "2025 Secretary Directive" this FACA Committee has been terminated. Reports: This committee did not produce any public reports. Website: There is no committee website. Chairs: The 11/1/24 and 3/14/25 meetings had a co-chair. The DFO and Committee Decision Maker positions are held by the same individual because of the assignment of responsibilities within the Institute. The members of this Special Emphasis Panel (SEP) do not have standing appointments and serve on an as needed basis for meetings throughout the fiscal year. Therefore, the members list does not reflect appointment start and end dates. As often as possible, instead of appointment start and end dates, each meeting date on which the SEP member served is identified on the Members list. When necessary to protect peer review integrity, a fiscal year start and end date is used as the alternative to appointment start and end dates for some SEP members. As a result, the Members list, including the number of chairs, may not align or directly match to specific meeting dates. Meeting rosters, including members' affiliations and zip codes are available online at <https://public.era.nih.gov/pubroster/>.

Narrative Description

NIH's mission is to seek fundamental knowledge about the nature and behavior of living systems and the application of that knowledge to enhance health, lengthen life, and reduce illness and disability. NIH works toward that mission by supporting the research of non-Federal scientists in universities, medical schools,

hospitals, and research institutions throughout the country and abroad. Section 492 of the PHS Act states that The Secretary...shall by regulation require appropriate technical and scientific peer review of -- (A) applications...; and (B) biomedical and behavioral research and development contracts...

What is the approximate Percentage of these recommendations that have been or will be Fully implemented by the agency?

15%

% of Recommendations Fully Implemented Comments

The percentage of recommendations implemented stated above was developed at the time the Annual Comprehensive Review report was prepared and include recommendations for grant funding. Additional information on grant funding is available through the RePORT (Research Portfolio Online Reporting Tool) website. RePORT provides access to reports, data, and analyses of NIH research activities that advance the mission of the NIH, including information on NIH expenditures, strategic plans, reports on NIH funding, and reports on the organization and people involved in NIH research and research training. The RePORT website is located at <http://report.nih.gov>.

Action Comments

An action of approved or recommended for grants receiving initial peer review by this committee does not infer that the grant will be or has been funded. Research grant applications submitted to NIH must go through a two-step review process that includes the initial peer review for scientific and technical merit and a second step of review and approval by a National Advisory Council for program relevance. In addition, prior to an award or funding being made, NIH staff must conduct an administrative review for a number of other considerations. These include alignment with NIH's funding principles, review of the project budget, assessment of the applicant's management systems, determination of applicant eligibility, and compliance with public policy requirements. After all these steps have been completed, NIH officials make funding decisions on individual grant applications.
