20a. How does the Committee accomplish its purpose?

Section 3302(a)(1) of the Zadroga Act establishes that the World Trade Center (WTC) Health Program Scientific/Technical Advisory Committee (STAC) will review scientific and medical evidence and make recommendations to the WTC Health Program Administrator on additional WTC Health Program eligibility criteria, additional WTC-related health conditions, and research needs. The committee may be consulted on other matters as related to and outlined in the Act at the discretion of the WTC Health Program Administrator.

20b. How does the Committee balance its membership?

It is anticipated that the WTC Health Program STAC will consist of at least 17 members.

Because the focus of this committee is on the WTC disaster, members with experience in treating WTC diseases will be needed. As much as possible, this committee will have both geographic diversity and a diverse makeup. The membership of the WTC Health Program STAC will, at a minimum, consist of 4 occupational physicians, at least two of whom have experience treating WTC rescue and recovery workers; 1 physician with expertise in pulmonary medicine; 2 environmental medicine or environmental health specialists; 3 representatives of WTC responders; 3 representatives of certified-eligible WTC survivors; an industrial hygienist; a toxicologist; an epidemiologist; and a mental health professional. Additional members may be appointed at the discretion of the WTC Health Program Administrator.

20c. How frequent and relevant are the Committee Meetings?

Meetings are called as needed to inform the WTC Health Program Administrator on issues required by the statute. The meetings are highly relevant to the WTC Health Program.

20d. Why can't the advice or information this committee provides be obtained elsewhere?

The committee was established as required by Public Law 111-347 (The James Zadroga 9/11 Health and Compensation Act of 2010).

20e. Why is it necessary to close and/or partially closed committee meetings?

NA

21. Remarks

Two meetings were held in FY23. During the first meeting, held on February 9, 2023, the STAC issued four recommendations regarding substantive amendments to the existing Policy and Procedures for Adding Non-Cancer Health Conditions to the List of WTC-Related Health Conditions. The WTC Health Program fully implemented two of the recommendations and partially implemented two of them. On the second meeting, held on June 21-22, 2023, the STAC issued the recommendation to adopt further substantive amendments to the existing Policy and Procedures for Adding Non-Cancer Health Conditions to the List of WTC-Related Health Conditions. In addition, the STAC provided advice regarding the new youth research cohort being established by the WTC Health Program. Finally, in 2023 the WTC Health Program fully implemented the FY22 STAC recommendation of adding uterine cancer to the List of WTC-Related Health Conditions.

Designated Federal Officer

Tania Carreón-Valencia Senior Scientist
