20a. How does the Committee accomplish its purpose?

Section 492 of the PHS Act states that The Secretary...shall by regulation require appropriate technical and scientific peer review of -- (A)

applications...; and (B) biomedical and behavioral research and development contracts... This committee was composed of recognized biomedical and/or behavioral research authorities who represented the forefront of research and technical knowledge and who provided first-level merit review of highly scientific and technical research grant applications, research training applications, and contract proposals concerned with research on aging in the basic biological, clinical, biomedical and behavioral sciences. During this reporting period the committee reviewed 401 applications requesting \$276,526,672.

20b. How does the Committee balance its membership?

The members of the committee were authorities knowledgeable in the various disciplines and fields relating to clinical, basic, behavioral, and social sciences related to aging. Members were also knowledgeable in the aging processes, geriatrics, gerontology and/or development of curricula in all facets of aging research. More specifically, members had expertise in molecular biology, neurology, neurochemistry, cell biology, nutrition, immunology, demography, economics, psychology, and sociology.

20c. How frequent and relevant are the Committee Meetings?

The committee held 8 meetings during this reporting period.

20d. Why can't the advice or information this committee provides be obtained elsewhere?

This committee was composed of recognized biomedical research authorities who represented the forefront of research and technical knowledge

and who provided first-level merit review of highly scientific and technical research grant applications and contract proposals. These evaluations and recommendations could not be obtained from other sources because the specialized, complex nature of the applications and proposals required a unique balance and breadth of expertise not available on the NIH staff or from other established sources.

20e. Why is it necessary to close and/or partially closed committee meetings?

The meetings of the committee were closed to the public for the review of grant applications. Sections 552b(c)(4) and 552b(c)(6) of the Government in the Sunshine Act permit the closing of meetings where discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information, the disclosure of which would constitute a clearly unwarranted invasion of personal property.

21. Remarks

Per "2025 Secretary Directive " this FACA Committee has been terminated. Reports: This committee did not produce any public reports this year. Members: The term of service end dates for all the members are different than what was reported on the FY24 ACR due to the termination of this committee. DFO/Committee Decision Maker: The DFO and Committee Decision Maker functions were held by the same individual based on delegations of authority and assigned duties in this Institute. Occupation/Affiliation: Due to the larger number of members that served on this committee, NIH staff are unable to provide additional information on Occupation or Affiliation. Additional information on an individual's affiliation

may be obtained by contacting the designated federal officer listed in this report. Zip Codes: Due to the large number of members associated with this committee, NIH staff are unable to provide individual zip codes for all members. Current individual meeting rosters, including zip codes are available on line at <https://public.era.nih.gov/pubroster/>. In general, initial/integrated review group (IRG) members serve up to six years, which is documented in the Members list. Temporary members are individuals recruited based on expertise needed for each meeting. Some temporary members may attend one meeting only while others may attend multiple meetings. Instead of appointment start and end dates, each meeting date on which the temporary member served is identified on the Members list. Meeting rosters, including members' affiliations and zip codes are available online at <https://public.era.nih.gov/pubroster/>.

Narrative Description

NIH’s mission is to seek fundamental knowledge about the nature and behavior of living systems and the application of that knowledge to enhance health, lengthen life, and reduce illness and disability. NIH works toward that mission by supporting the research of non-Federal scientists in universities, medical schools, hospitals, and research institutions throughout the country and abroad. Section 492 of the PHS Act states that The Secretary...shall by regulation require appropriate technical and scientific peer review of - (A) applications...; and (B) biomedical and behavioral research and development contracts... This committee was composed of recognized biomedical and/or behavioral research authorities who represented the forefront of research and technical knowledge and who provided first-level merit review of highly scientific and technical research grant applications in the fields of molecular biology, neurology, neurochemistry, cell biology, nutrition, immunology, demography, economics, psychology, and sociology.

NIH Peer Review Committees were involved in the initial review of research grant applications. The NIH dual peer review system was mandated by statute in accordance

with section 492 of the Public Health Service Act. The charge to this committee was to determine scientific and technical merit of the individual grants or contracts. These recommendations were forwarded to Federal officials who generally accept the committee's recommendations and favorable applications were then forwarded for the second level of review performed by Institute and Center (IC) National Advisory Councils or Boards. Only applications that were favorably recommended by both the initial peer review committee and the Advisory Council were recommended for funding.

What is the approximate Percentage of these recommendations that have been or will be Partially implemented by the agency?

Action Comments

An action of approved or recommended for grants receiving review by this council does not infer that the grant will be or has been funded. Research grant applications submitted to NIH must go through a two-step review process that includes initial peer review for scientific and technical merit and a second step of review for a number of other considerations. These include alignment with NIH's funding principles, review of the project budget, assessment of the applicant's management systems, determination of applicant eligibility, and compliance with public policy requirements. After all of these steps have been completed, NIH officials make funding decisions on individual grant applications.
