20a. How does the Committee accomplish its purpose?

Section 402(b)(3) of the Public Health Service Act states that ...the Director, NIH...shall assure that research at...the National Institutes of Health is subject to review in accordance with section 492. Section 492(b) states that the Director of NIH shall establish procedures for periodic technical and scientific peer review of research at the National Institutes of Health. This Board assesses the quality of the Institute's intramural research programs and evaluates the productivity and performance of staff scientists, necessary functions for the operation of a highly effective intramural research program. The committee did not meet this year so no recommendations were made.

20b. How does the Committee balance its membership?

The Board of Scientific Counselors, National Institute of Biomedical Imaging and Bioengineering consists of 8 members, including the chair, who are knowledgeable in the issues related to the Board's function. They are selected from among the outstanding authorities of the health and scientific disciplines relevant to the activities of the Institute, including representatives of the health and scientific disciplines in the area of biomedical imaging and biomedical engineering.

20c. How frequent and relevant are the Committee Meetings?

The Board did not meet this fiscal year for the peer review of intramural laboratories.

20d. Why can't the advice or information this committee provides be obtained elsewhere?

The Board is composed of recognized biomedical research authorities from outside the NIH in order to secure unbiased and objective evaluation of intramural research programs. Their recommendations are invaluable because the complex nature of research in each laboratory requires a unique balance and breadth of expertise not available on the NIH staff or from other established resources.

20e. Why is it necessary to close and/or partially closed committee meetings?

NA

21. Remarks

Committee Function: Other - Scientific and Technical Peer Review. Reports: This committee did not produce any reports during the fiscal year. URL: This committee does

not have a dedicated website. DFO/Committee Decision Maker: The NIBIB intramural research program is small and the Director serves as both the DFO and the Decision Making Official. Meetings/Members: The committee did not meet in FY2018 because there were no members. Nominations are in process to replace all the members of this committee. It has been challenging to recruit the necessary breadth of expertise needed. It is expected the member appointments will be finalized in 2019. After members are appointed, staff will schedule a committee meeting. Costs: Although no meetings were held, staff costs for administrative functions (reports, identifying members, etc.) have been included for FY18.

Designated Federal Officer

Richard Leapman DIRECTOR, INTRAMURAL RESEARCH PROGRAM

Narrative Description

The goal of NIH research is to acquire new knowledge to help prevent, detect, diagnose, and treat disease and disability, from the rarest genetic disorder to the common cold. The NIH mission is to uncover new knowledge that will lead to better health for everyone. NIH works toward that mission by conducting research in its own laboratories. Section 402(b)(3) of the Public Health Service Act states that “the Director, NIH...shall assure that research at...the National Institutes of Health is subject to review in accordance with section 492.” Section 492(b) states that the “Director of NIH shall establish procedures for periodic technical and scientific peer review of research at the National Institutes of Health.” This Board assesses the quality of the Institute intramural research programs and evaluates the productivity and performance of staff scientists, necessary functions for the operation of a highly effective intramural research program.

Cost Savings Comments

NIH-supported basic and clinical research accomplishments often take many years to unfold into new diagnostic tests and new ways to treat and prevent diseases.

What is the approximate Number of recommendations produced by this committee for the life of the committee?

22

Number of Recommendations Comments

The committee did not meet, thus no recommendations were made in FY2018.

What is the approximate Percentage of these recommendations that have been or will be Fully implemented by the agency?

0%

% of Recommendations Fully Implemented Comments

Information on the research funded by NIH is available through the RePORT (Research Portfolio Online Reporting Tool) Website. RePORT provides access to reports, data, and analyses of NIH research activities that advance the mission of the NIH, including information on NIH expenditures, strategic plans, reports on NIH funding, and reports on the organization and people involved in NIH research and research training. The RePORT website is located at <http://report.nih.gov>.
