20a. How does the Committee accomplish its purpose?

The Applied Sciences Advisory Committee (ASAC) is responsible for providing findings and recommendations for planning and prioritizing the NASA Earth Science Division's Applied Sciences Program activities and serves as a community-based, interdisciplinary forum for analysis. The ASAC's recommendations and analysis can be used to inform NASA decisions on the programmatic scope and priorities, as well as implementation of Applied Sciences programs. In addition, the ASAC will provide a regular forum for broad discussion of Earth Science applications and the role of Applied Sciences within and outside of NASA.

20b. How does the Committee balance its membership?

The ASAC has approximately 9-12 members, consisting of a mix of Earth scientists, social scientists, policy makers, end-users, and communicators of NASA applications from the broad community of academia, industry, government, and the commercial sector. In addition, the ASAC membership will consist of individuals with appropriate expertise in state, local, regional, and tribal agencies, the university research community, and the remote sensing and other geospatial information industries, to assess the program. The Director, Earth Science Division, shall ensure a balanced representation in terms of points of view represented and the functions to be performed. The membership balance is not static, and the expertise or experience relevant to the mission/function of the ASAC changes over time, depending on the work of the committee.

20c. How frequent and relevant are the Committee Meetings?

The ASAC meets two or three times per year, or as required by the Director, Earth Science Division.

20d. Why can't the advice or information this committee provides be obtained elsewhere?

The ASAC is a nondiscretionary Federal advisory committee mandated by Federal statute.

20e. Why is it necessary to close and/or partially closed committee meetings?

N/A
