20a. How does the Committee accomplish its purpose?

Section 492 of the PHS Act states that The Secretary shall by regulation require appropriate technical and scientific peer review--(A) applications; and (B) biomedical and behavioral research and development contracts. This committee is composed of recognized biomedical and/or behavioral research authorities who represent the forefront of research and technical knowledge and who provide first-level merit review of highly scientific and technical research grant applications (and/or contract proposals) that focus on scientific areas relevant to minority health and health disparities. Operation of this committee is accomplished using a fluid membership, with members designated to serve for individual meetings rather than formally appointed for fixed terms of service. In FY 2025, the Special Emphasis Panel reviewed 307 grant applications requesting \$292,190,847 in support.

20b. How does the Committee balance its membership?

Members and Chairs were selected by the Director, NIH, or designee, from authorities who are knowledgeable in the various disciplines and fields relating to minority health, health disparities, health care, clinical and health services research, behavioral research, community health and population sciences, genomics, pharmacokinetics, cancer, diabetes, infant mortality, AIDS, and cardiovascular disease. Members were invited to serve on an "as-needed" basis for each meeting. Up to one-fourth of the SEP members may be officers or employees of the Federal Government. Federal members served as Regular Government Employees. All non-Federal members served as

NIH Peer Review Consultants.

20c. How frequent and relevant are the Committee Meetings?

The committee held 10 FACA and 4 working group meetings during this reporting period. The flexibility in review allowed by this committee structure has proved both efficient and effective.

20d. Why can't the advice or information this committee provides be obtained elsewhere?

This committee is composed of recognized biomedical and/or behavioral research authorities who represent the forefront of research and technical knowledge and who provide first-level merit review of highly scientific and technical research grant applications and contract proposals. These evaluations and recommendations cannot be obtained from other sources because the specialized, complex nature of the applications and proposals requires a unique balance and breadth of expertise not available on the NIH staff or from other established sources.

20e. Why is it necessary to close and/or partially closed committee meetings?

The meetings of the Special Emphasis Panel were closed to the public for the review of grant applications and/or contract proposals. Sections 552b(c)(4) and 552b(c)(6) of the Government in the Sunshine Act permits closing of meetings where discussion could reveal confidential trade secrets or commercial property such as patentable material and personal information, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

21. Remarks

Per "2025 Secretary Directive" this FACA Committee has been terminated. 2025 Secretary Directive-Elimination of Federal Advisory Committees Within the Department of Health and Human Services, Terminated 06.30.2025. EO 14217 Reducing the Scope of the Federal Bureaucracy. Reports: This committee did not produce any public reports during the fiscal year. Website: There is no dedicated website for this committee. Chairs: The 10/30-11/1/2024; 11/6-8/2024; 4/16-18/2025; 04/21-24/2025; 04/21-25/2025; and 4/29/2025 meetings had a co-chair. The members of this Special Emphasis Panel (SEP) do not have standing appointments and serve on an as needed basis for meetings throughout the fiscal year. Therefore, the members list does not reflect appointment start and end dates. As often as possible, instead of appointment start and end dates, each meeting date on which the SEP member served is identified on the Members list. When necessary to protect peer review integrity, a fiscal year start and end date is used as the alternative to appointment start and end dates for some SEP members. As a result, the Members list, including the number of chairs, may not align or directly match to specific meeting dates. Meeting rosters, including members' affiliations and zip codes are available online at <https://public.era.nih.gov/pubroster/>.

Narrative Description

NIH's mission is to seek fundamental knowledge about the nature and behavior of living systems and the application of that knowledge to enhance health, lengthen life, and reduce illness and disability. NIH works toward that mission by supporting the research of non-Federal scientists in universities, medical schools, hospitals, and research institutions throughout the country and abroad. Section 492 of the PHS Act states that The Secretary shall by regulation require appropriate technical and scientific peer review of -(A) applications; and (B) biomedical and behavioral research and development contracts. This committee was composed of recognized biomedical and/or behavioral research authorities who represent the forefront of research and technical knowledge and who provided first level merit review of highly scientific and technical research grant applications (and/or contract proposals) that focus on scientific areas relevant to minority health and health disparities.

Action Comments

An action of “approved” or “recommended” for grants receiving initial peer review by this committee does not infer that the grant will be or has been funded. Research grant applications submitted to NIH must go through a two-step review process that includes the initial peer review for scientific and technical merit and a second step of review and approval by a National Advisory Council for program relevance. In addition, prior to an award or funding being made, NIH staff must conduct an administrative review for a number of other considerations. These include alignment with NIH’s funding principles, review of the project budget, assessment of the applicant’s management systems, determination of applicant eligibility, and compliance with public policy requirements. After all these steps have been completed, NIH officials make funding decisions on individual grant applications.
