Purpose

The next AHRQ National Advisory Council meeting will be on Friday, November 3, 2017. There will be a subcommittee meeting for the National Healthcare Quality and Disparities Report scheduled to begin at 7:30 a.m. This meeting is open to the public. The Council meeting will convene at 8:30 a.m., with the call to order by the Council Chair and approval of previous Council summary notes. The meeting is open to the public and will be available via webcast at www.webconferences.com/ahrq. The meeting will begin with an update on AHRQ's current research, programs, and initiatives. The agenda will also include an update on AHRQ's work in learning health care systems and an update on AHRQ's data platform. The final agenda will be available on the AHRQ website at www.AHRQ.gov no later than Friday, October 27, 2017.

Start

End

11/03/2017 - 11/03/2017

The next AHRQ National Advisory Council meeting will be on Friday, March 16, 2018 via WebEx. For information regarding how to access the WebEx as well as other meeting details, please go to <https://ahrq.gov/news/events/nac>. The Council meeting will convene at 8:30 a.m., with the call to order by the Council Chair and approval of previous Council summary notes. The meeting will begin with an update on AHRQ's current research, programs, and initiatives. The agenda will also include an update the Healthcare Cost and Utilization Project (HCUP) new release of state and local data. The final agenda will be available on the AHRQ website at www.AHRQ.gov no later than Friday, March 9, 2018.

03/16/2018 - 03/16/2018

The next AHRQ National Advisory Council meeting will be on Wednesday, July 18, 2018. The Council meeting will convene at 8:30 a.m., with the call to order by the Council Chair and approval of previous Council summary notes. The meeting is open to the public and will be available via webcast at www.webconferences.com/ahrq. The meeting will begin with an update on AHRQ's current research, programs, and initiatives. The agenda will also include an updates on AHRQ Data, Analytics, and Insights, Making Health Services Research Relevant to the C-Suite and AHRQ's Opioids efforts. The final agenda will be available on the AHRQ website at www.AHRQ.gov no later than Friday, July 13, 2018.

20a. How does the Committee accomplish its purpose?

The Charter of the National Advisory Council for Healthcare Research and Quality, as provided for under P.L. 92-463, Section 921 establishes two functions: 1) the Council shall advise the Secretary and the Director with respect to activities to carry out the purpose of the Agency under section 901(b); and make recommendations to the Secretary of HHS and the Director on matters related to actions of the Agency to enhance the quality, improve the outcomes, and reduce the costs of health care services, as well as improve access to such services, through scientific research and the promotion of improvements in clinical practice and in the organization, financing, and delivery of health care services 2) the Council shall advise the Secretary and Director through recommendations regarding priorities for a national agenda and strategy for: priorities regarding health care research , especially studies related to quality, outcomes, cost and utilization of, and access to, health care services; the field of health care research and related disciplines, especially issues related to training needs,, and dissemination of information pertaining to health care quality; and the appropriate role of the Agency in each of these areas in light of private sector activity and identification of opportunities for public-private partnerships.

20b. How does the Committee balance its membership?

The Council shall consist of 21 appropriately qualified individuals from non-federal government organizations. Additionally, a number of ex-officio members are also part of

the Council. At least 17 members of the Advisory Council shall be representatives of the public who are not officers or employees of the United States and at least 1 member who shall be a specialist in the rural aspects of 1 or more of the following professions or fields. Of such members: 3 shall be individuals distinguished in the conduct of research, demonstration projects, and evaluations with respect to health care; 3 shall be individuals distinguished in the fields of health care quality research or health care improvement; 3 shall be individuals distinguished in the practice of medicine of whom at least one shall be a primary care practitioner; 3 shall be individuals distinguished in the other health professions; 3 shall be individuals either representing the private health care sector, including health plans, providers, and purchasers or individuals distinguished as administrators of health care delivery systems; 3 shall be individuals distinguished in the fields of health care economics, information systems, law, ethics, business, or public policy; and 3 shall be individuals representing the interests of patients and consumers of health care. The Council also shall include Federal officials as ex officio members. The Secretary shall designate as ex officio members of the Advisory Council: the Assistant Secretary for Health, the Director of the National Institutes of Health, the Director of the Centers for Disease Control and Prevention, the Administrator of the CMS, the Commissioner of the Food and Drug Administration, the Director of the Office of Personnel Management, the Assistant Secretary of Defense (Health Affairs), and the Under Secretary for Health of the Department of Veterans Affairs. Such other Federal officials as the Secretary may consider appropriate may also be appointed.

20c. How frequent and relevant are the Committee Meetings?

The National Advisory Council for Healthcare Research and Quality meets 3 times during each fiscal year. The Council provides valuable recommendations to the Director on policy issues and priorities for improving the quality, appropriateness, and effectiveness of health care provided in the nation. It does so by recommending topics and issues on which the Agency should focus its limited resources to provide the most benefit to the public, health care industry, and clinicians. The Council helps AHRQ identify other government and private sector organizations with similar interests that might partner with the Agency in developing the knowledge base and the methods to achieve goals of mutual interest.

20d. Why can't the advice or information this committee provides be obtained elsewhere?

This Council was established by Congress in recognition of the absence of such a formal body of advisors to the Secretary, HHS and Director, AHRQ on matters related to AHRQ. It is the Agency's responsibility, under law, to enhance the quality, appropriateness, and effectiveness of health care services and access to such services through scientific

research and the promotion of improvements in clinical practice, organization, financing, and delivery of health care services. The currently serving Council members represent expertise in a variety of areas such as managed care, health services research, direct care delivery, consumer health and law, health economics, and health benefits. It is the intent of the Congress that advice and assistance in this area be provided by a broadbased representative group of distinguished individuals. The Council is governed by provisions of P.L. 92-463 (5 U.S.C. Appendix 2), which sets forth standards for the formation and use of advisory committees.

20e. Why is it necessary to close and/or partially closed committee meetings?

Meetings are not closed.

21. Remarks

Performance measures did not change.

Narrative Description

The National Advisory Council (NAC) provides advice to the Secretary of DHHS and the Director, Agency for Healthcare Research and Quality (AHRQ) on matters related to AHRQ activities to improve the quality, safety, efficiency, and effectiveness of healthcare for all Americans. As a result of the Agency's increased emphasis on strategic planning, the Agency has shifted from a focus on output and process measurement to a focus on outcome measures. The NAC has been extremely helpful in working through this process and new focus through in depth discussions at meetings held throughout the year. Individual NAC members also work with Agency staff on an ongoing basis throughout the year needed.

What are the most significant program outcomes associated with this committee?

	Checked if Applies
Improvements to health or safety	<input checked="" type="checkbox"/>
Trust in government	<input checked="" type="checkbox"/>
Major policy changes	<input type="checkbox"/>
Advance in scientific research	<input checked="" type="checkbox"/>
Effective grant making	<input type="checkbox"/>
Improved service delivery	<input checked="" type="checkbox"/>
Increased customer satisfaction	<input checked="" type="checkbox"/>
Implementation of laws or regulatory requirements	<input type="checkbox"/>

What is the approximate Number of recommendations produced by this committee for the life of the committee?

57

Number of Recommendations Comments

The National Advisory Council for Healthcare Research and Quality (NAC) was established in accordance with Section 921 (now Section 941) of the Public Health Service Act (42 U.S.c. 299 c). In accordance with its statutory mandate, the Council is to advise the Secretary of the Department of Health and Human Services and the Director, Agency for Healthcare Research and Quality (AHRQ), on matters related to actions of the Agency to enhance the quality, improve the outcomes, reduce the costs of health care services, improve access to such series through scientific research and promote improvements in clinical practice and in the organization, financing, and delivery of health care services. The Council is composed of members of the public, appointed by the Secretary, and Federal ex-officio members. The Council is composed of a wide variety of individuals and organizations that provide unparalleled guidance and expertise in helping AHRQ shape its goals and priorities. In addition, a portion of the meeting is devoted to comments from the public to solicit input and comments to help shape the AHRQ research agenda. Occasionally, new legislation and/or important issues to the Secretary of Health and Human Services, or the Director of AHRQ warrant the formation of a

Subcommittee to the NAC (called SNACs) make formal recommendations. While all SNACs make comments and provide advice that influence decisions at AHRQ, formal recommendations have been made by the SNAC addressing the Children's Health Insurance Program Reauthorization (CHIPRA) and the SNAC to identify quality measures for Medicaid-eligible adults. There were no new recommendations for FY2017. 2009 SNAC. Title IV of the Children's Health Insurance Program Reauthorization Act (CHIPRA; Public Law 111-3) required the Secretary of the U.S. Department of Health and Human Services (HHS) to identify and post for public comment by January 1, 2010, an initial, recommended core set of children's health care quality measures for voluntary use by Medicaid and Children's Health Insurance Programs (CHIP), health insurance issuers and managed care entities that enter into contracts with such programs, and providers of items and services under such programs. In collaboration with CMS, AHRQ sought external advice from a 2009 Subcommittee on Child Health Quality Measures for Medicaid and CHIP (SNAC) of AHRQ's National Advisory Council (NAC) to identify such measures. The SNAC met twice during 2009; its charter expired in December 2009. The CHIPRA SNAC recommended to the NAC 25 children's health care quality measures for the initial core set: <http://www.ahrq.gov/chipra/coreset/coreset2.htm#second>.

Subsequently, the Secretary posted for public comment 24 children's healthcare quality measures for the initial core set for voluntary use by Medicaid and CHIP programs. As reported in the Secretary's annual report to Congress, States have been reporting on most of these measures.

<http://www.medicaid.gov/Medicaid-CHIP-Program-Information/By-Topics/Quality-of-Care/CHIPR> core set. The Affordable Care Act requires the Secretary of the Department of Health and Human Services (HHS) to identify and publish a core set of health quality measures for Medicaid-eligible adults. To help facilitate an evidence-based and transparent process for prioritizing measures, the National Advisory Council of the Agency for Healthcare Research and Quality (AHRQ) created this Subcommittee for identifying quality measures for Medicaid-eligible adults that could be used for State level quality improvement and voluntary reporting about the care adults eligible for Medicaid receive. The Medicaid SNAC recommended 26 measures 2012 CHIPRA SNAC. Title IV of the Children's Health Insurance Program Reauthorization Act (CHIPRA; Public Law 111-3) also required the Secretary of the U.S. Department of Health and Human Services (HHS) to establish a Pediatric Quality Measures Program for the following purposes: 1. Improve and strengthen the initial core set of measures of health care quality established under CHIPRA 2. Expand on existing pediatric quality measures used by public and private health care purchasers, and 3. Increase the portfolio of evidence-based consensus pediatric quality measures available to public and private purchasers of children's health care services, providers, and consumers. AHRQ funded 7 Centers of Excellence in Pediatric Quality Measurement (COEs) to develop and enhance children's healthcare quality measures;

topic priorities were set by the Centers for Medicare and Medicaid Services. In addition, a call for public nominations was issued in early 2012 to satisfy in part the CHIPRA legislation requirement for extensive stakeholder involvement in the PQMP. The NAC appointed a new Subcommittee charged with assessing COE-developed and publicly nominated measures. Between July and September 2012, the Subcommittee used a modified Delphi process to assess measures on a set of desirable measure attributes; the Subcommittee's work in 2012 culminated in a recommendation of 5 measures to be added to the initial core set and 2 for use by other public and private health care purchasers, providers, and consumers, as specified above.

What is the approximate Percentage of these recommendations that have been or will be Fully implemented by the agency?

93%

% of Recommendations Fully Implemented Comments

There were no new recommendations for FY 2018. 2009 SNAC Recommendations. 22 of the 25 SNAC recommendations were fully implemented by the Agency.

SNAC-recommended measures not implemented by HHS were those for suicide screening and the CAHPS Clinician and Group Survey; in addition, HHS separated the 3 SNAC well child care visit measures (which SNAC recommended as one measure) into 3 separate measures. As a result, the Secretary HHS posted 24 measures for States to voluntarily report to CMS on December 29, 2009. In September 2011, the Secretary reported the number of States that reported on each of the measures.

<http://www.medicaid.gov/Medicaid-CHIP-Program-Information/By-Topics/Quality-of-Care/Downl>

CMS is working with States to provide technical assistance to increase State reporting levels. Adult Medicaid SNAC. The adult Medicaid SNAC recommendations are 100% implemented. The Adult Medicaid SNAC recommended 26 measures and all were accepted and published. CMS and AHRQ embraced the recommendations 100% and are working to assist States with 100% implementation. The agencies are doing this by working collaboratively to further refine and standardize data elements for the measures and test them in States and by working to identify ways to facilitate State voluntary reporting through alignment with other HHS quality reporting initiatives; coordinate quality measurement efforts with payment reform strategies, health information technology, and electronic health record initiatives; and identify priority areas for the development of new measures. 2012 CHIPRA SNAC recommendations (or child Medicaid and CHIP recommendations). As of mid-October 2012, CMS had not yet made its recommendations to State Medicaid and CHIP programs. These recommendations are due by January 1, 2013. According to CMS staff, CMS plans to recommend only 3 of the 7 measures to Medicaid and CHIP programs for voluntary reporting to CMS and subsequent reporting by

the Secretary to Congress.

What is the approximate Percentage of these recommendations that have been or will be Partially implemented by the agency?

93%

% of Recommendations Partially Implemented Comments

This is based on the assumption that CMS will adopt 3 of the 7 recommendations making a total of 53 fully implemented out of a possible 57.

Does the agency provide the committee with feedback regarding actions taken to implement recommendations or advice offered?

Yes No Not Applicable

Agency Feedback Comments

The Agency provides feedback to the committee by distributing follow-up white papers and the Director's update to reports to the members. Also, Agency staff meet with NAC members.

What other actions has the agency taken as a result of the committee's advice or recommendation?

Checked if Applies

- Reorganized Priorities
- Reallocated resources
- Issued new regulation
- Proposed legislation
- Approved grants or other payments
- Other
