19. Federal Staff Support Years (FTE)	0.25	0.00

20a. How does the Committee accomplish its purpose?

The Committee was renewed by the Secretary to perform a single, time-limited task. The Committee will develop and make recommendations to the Secretary regarding the development of Healthy People 2030 and the initial implementation phase of the goals and objectives. The Committee is scheduled to be terminated upon delivery of its final report to the Secretary or two years from the date the charter was filed unless the charter is renewed.

20b. How does the Committee balance its membership?

The Committee is authorized to consist of not more than 13 members. One or more members will be selected to serve as the Chair, Vice Chair, and/or Co-Chairs. The Committee membership may include former Assistant Secretaries for Health and nationally known experts in areas such as biostatistics, business, epidemiology, health communications, health economics, health information technology, health policy, health sciences, health systems, international health, outcomes research, public health law, social determinants of health, special populations, and state and local public health and from a variety of public, private, philanthropic, and academic settings. Individuals will be selected to serve as members of the Committee based upon their qualifications, level of expertise and knowledge, and ability to contribute to the work that is to be performed by the Committee. Individuals appointed to serve as members of the Committee will have demonstrated expertise of current science and in the fields of disease prevention or health promotion. Individuals will be selected to serve as members of the Committee to represent balanced viewpoints of the current scientific evidence sought by the Secretary to meet the

Committee's charge.

20c. How frequent and relevant are the Committee Meetings?

The Committee is expected to meet two times per year during the course of its operation. In FY2020, the Committee met one time publicly via webinar.

20d. Why can't the advice or information this committee provides be obtained elsewhere?

Under 42 U.S.C. 217a, Section 222 of the Public Health Service Act, as amended, the Department of Health and Human Services (HHS; the Department) is mandated to establish national health promotion and disease prevention goals. HHS established the Healthy People initiative in 1979 to comply with this mandate. Over the past four decades, the Department has established ten-year national disease prevention and health promotion objectives that reflect the needs of the nation and carry stakeholder support. To provide assistance for developing the Healthy People 2020 objectives, a scientific advisory committee was utilized. Use of the advisory committee proved to be an effective means for obtaining competent review of the science, authoritative recommendations, and a broad public acceptance of the objectives that were developed. It was determined that the same process should be utilized for developing the Healthy People 2030 objectives. The Committee is advising the Secretary, through the Assistant Secretary for Health, on the development of Healthy People 2030, including its mission, vision, framework, organizational structure, and criteria for selecting objectives, and implementation activities. It is in the public's interest that a federal advisory committee provide the Department with assistance for development of the objectives for the next

decade. Use of an expert scientific advisory committee to assist in this task ensures that the objectives are salient and science-based. An expert scientific advisory committee provides relevant and objective advice through an open process that fosters the cooperation and commitment from both the public and private sectors. Working jointly and in collaboration with agency staff and other Federal stakeholders, regional components, and the public sector ensures transparency in developing objectives that reflect national health priorities and favorable reception and implementation by stakeholders.

20e. Why is it necessary to close and/or partially closed committee meetings?

All Committee meetings are open to the public, except as determined otherwise by the Secretary or other official to whom this authority has been delegated, in accordance with guidelines under Government in the Sunshine Act at 5 U.S.C. 552b(c) and the FACA..

21. Remarks

In 1979, the Department established the Healthy People initiative to develop a framework for improving the health of all people in the United States. Healthy People provides evidence-based, ten-year national objectives with targets for improving the health of all Americans. Healthy People offers a strategic agenda to align health promotion and disease prevention activities in communities around the country. Since inception of the initiative, HHS has issued a comprehensive set of national public health objectives every 10 years. For Healthy People 2030, the Department is developing a more focused set of ten-year national disease prevention and health promotion objectives that reflect the nation's needs and

carries stakeholder support. Utilizing an expert scientific advisory committee to assist with this task is ensuring that independent advice based on current scientific evidence is provided. The Committee is providing advice and making recommendations regarding identifying priorities and criteria for selecting objectives that addresses high-impact public health challenges. The Committee has delivered to the Secretary, through the Assistant Secretary for Health, recommendations on the Healthy People 2030 mission statement, vision statement, framework, and organizational structure. The Committee's advice on HHS's selection criteria for identifying a focused set of measurable, nationally representative objectives is helping the Department to define the objectives that represent the most critical public health issues that high-impact priorities support by current, national data sets. The Committee's advice identifying priorities and criteria for selecting objectives has helped to prioritize the objectives proposed for Healthy People 2030 and supported a reduction in the number of overall objectives. The Committee's recommendations for selecting the Leading Health Indicators, engaging and communicating with stakeholders, and setting targets have guided efforts to identify the Healthy People 2030 Leading Health Indicators, informed HHS efforts to engage stakeholders, and set meaningful targets, respectively. In FY2020, the Committee produced a report with recommendations for Building a Data Partnership Infrastructure for Healthy People 2030 for the HHS Secretary. The only annual reporting requirement that the Committee must satisfy is to update the file on its activities that will be maintained in the FACA database for the annual comprehensive review. There is no other requirement to provide an annual written report on

the Committee's activities/accomplishments. Committee members are reimbursed for travel and per diem, but received no additional compensation. Please note that in FY2020, there were no in-person Committee meetings and reimbursement for travel for not needed; this eliminated the anticipated \$54,000 in reimbursement for travel. A At the start of FY2020, this Committee was on track to fulfill its charge. The Committee was able to complete its charge after holding one open, online Committee meeting. The Committee's reduced level of activity accounts for the reduced budget allocated for FY2020. The Committee is term-limited and tasked to complete recommendations for a decade's worth of HHS activities within a compressed time frame. As a result, the Committee has established more than a dozen subcommittees in order for the Committee to complete its charge within HHS' desired time frame. The condensed time frame for the Committee's work is cause for the budget needed.

Narrative Description

The Committee will provide advice, consult with, and make recommendations to the Secretary on a broad range of topics, including the process of developing and implementing national health promotion and disease prevention goals and objectives for 2030. The Committee's recommendations, along with input from the public and federal partners, will help the Department develop the National Health Promotion and Disease Prevention Objectives for 2030 (Healthy People 2030). The Committee has advised the Secretary, through the Assistant Secretary for Health, on the following: the Healthy People 2030 mission statement, vision statement, framework, organizational structure; selection criteria for identifying a focused set of measurable, nationally representative objectives; the proposed set of Healthy People 2030 objectives; activities for implementing Healthy People 2030; efforts to engage stakeholders in disease prevention and health promotion; the establishment of a Healthy People 2030 framework graphic; the roles of health and well-being, health equity, health literacy, health promotion, law and policy, complex systems science, and summary measures in Healthy People 2030; and use of data partnerships to improve health and well-being for the nation.

What are the most significant program outcomes associated with this committee?

	Checked if Applies
Improvements to health or safety	<input checked="" type="checkbox"/>
Trust in government	<input checked="" type="checkbox"/>
Major policy changes	<input type="checkbox"/>
Advance in scientific research	<input checked="" type="checkbox"/>
Effective grant making	<input type="checkbox"/>
Improved service delivery	<input checked="" type="checkbox"/>

- | | |
|---|-------------------------------------|
| Increased customer satisfaction | <input checked="" type="checkbox"/> |
| Implementation of laws or regulatory requirements | <input type="checkbox"/> |
| Other | <input type="checkbox"/> |

Outcome Comments

What are the cost savings associated with this committee?

Checked if Applies

- | | |
|----------------------------|-------------------------------------|
| None | <input type="checkbox"/> |
| Unable to Determine | <input type="checkbox"/> |
| Under \$100,000 | <input type="checkbox"/> |

| \$500,001 - \$1,000,000 | <input type="checkbox"/> |
| \$1,000,001 - \$5,000,000 | <input type="checkbox"/> |
| \$5,000,001 - \$10,000,000 | <input checked="" type="checkbox"/> |
| Over \$10,000,000 | <input type="checkbox"/> |
| Cost Savings Other | <input type="checkbox"/> |

Cost Savings Comments

This Committee will make recommendations regarding the development and implementation of disease prevention and health promotion objectives for the nation. The use of prevention in healthcare has the potential to save thousands of dollars per person in the form of health care expenses avoided for the treatment of illness.

What is the approximate Number of recommendations produced by this committee for the life of the committee?

112

Number of Recommendations Comments

In FY 2020, the Committee's report included 11 distinct recommendations that were delivered to the Secretary. In FY 2019, the Committee's reports included 71 separate and distinct recommendations. Please note that the number of distinct Committee recommendations for FY 2018 was erroneously reported due to a misunderstanding in how the recommendations should be counted. In FY 2018, the Committee produced 29 specific and distinct recommendations in its reports to the Secretary.

What is the approximate Percentage of these recommendations that have been or will be Fully implemented by the agency?

75%

% of Recommendations Fully Implemented Comments

The percentage of Committee recommendations that may be fully implemented is at the discretion of the Secretary and the operating divisions within HHS.

What is the approximate Percentage of these recommendations that have been or will be Partially implemented by the agency?

10%

% of Recommendations Partially Implemented Comments

The percentage of Committee recommendations that may be partially implemented is at the discretion of the Secretary and the operating divisions within HHS.

Does the agency provide the committee with feedback regarding actions taken to implement recommendations or advice offered?

Yes ☒ No ☐ Not Applicable ☐

Agency Feedback Comments

The Office of Disease Prevention and Health Promotion anticipates providing feedback to the Committee members once feedback from the Secretary has been received.

What other actions has the agency taken as a result of the committee's advice or recommendation?

Checked if Applies

Reorganized Priorities	<input checked="" type="checkbox"/>
Reallocated resources	<input type="checkbox"/>
Issued new regulation	<input type="checkbox"/>
Proposed legislation	<input type="checkbox"/>
Approved grants or other payments	<input type="checkbox"/>
Other	<input type="checkbox"/>

Action Comments

Recommendations will be considered by the Healthy People 2030 Federal Interagency Workgroup, Office of the Assistant Secretary for Health, and Office of the Secretary.

Is the Committee engaged in the review of applications for grants?

No

Grant Review Comments

The Committee does not have grant-making authority and will have no involvement in decisions made about grants to be awarded..

How is access provided to the information for the Committee's documentation?
