18d. Total	\$0.00	\$0.00
19. Federal Staff Support Years (FTE)	0.00	0.00

20a. How does the Committee accomplish its purpose?

The committee accomplishes its purpose by providing advice and guidance regarding new scientific knowledge and technical developments and their practical applications to childhood lead poisoning prevention efforts. The committee also reviews and reports regularly on childhood lead poisoning prevention practices and recommends improvements in national childhood lead poisoning prevention efforts.

20b. How does the Committee balance its membership?

The committee consists of 13 members who are knowledgeable about pediatric lead screening, diagnosis, medical management, laboratory

issues, environmental lead hazard detection and reduction, preventive medicine, epidemiology, public health, and parents concerns. Members represent academia, state and local lead poisoning prevention programs, other federal agencies, private organizations, and the parents of lead poisoned children. Although the views of members reflect their individual fields of expertise and experience, no one point of view or area of expertise dominates the committee's recommendations.

20c. How frequent and relevant are the Committee Meetings?

The committee met twice in FY 2013. The committee charter facilitates the ability of the committee to respond to the changing problem of childhood lead poisoning in the United States. Despite dramatic reductions in the prevalence of lead poisoning over the past two decades, and while significant progress has taken place in our efforts to eliminate childhood lead poisoning, the magnitude of the problem remains large. Issues related to childhood lead poisoning remain complex, requiring the development of new strategies for prevention and control. The committee's ability to meet these challenges is enhanced by representation of ex officio's from Federal agencies and liaisons from non-governmental organizations.

20d. Why can't the advice or information this committee provides be obtained elsewhere?

CDC's goal to eliminate childhood lead poisoning can only be accomplished through collaborative activities with state and local childhood lead poisoning prevention programs, pediatricians, public health officials, and the public. These collaborative activities include providing advice

and making recommendations regarding childhood lead poisoning prevention. Issues surrounding childhood lead poisoning prevention and control have become complex, involving the need to develop innovative approaches to reach high-risk populations. Issues include: primary prevention, improved secondary prevention through medical and environmental case management, racial/ethnic disparities, lead hazards in non paint items, and the need to address other emerging issues. The capability to exchange current information about research, technological advances, and developments in the field of environmental management does not exist elsewhere in HHS.

20e. Why is it necessary to close and/or partially closed committee meetings?

N/A.

21. Remarks

The committee was terminated October 31, 2013. The committee did not have any committee meetings in FY14 generating no costs to the committee. This committee did not generate any reports in FY13.

Designated Federal Officer

Barbara A. Ellis Acting Deputy Associate Director for Science

Committee Members	Start	End	Occupation	Member Designation
Alarcon, Walter	07/01/2006	10/31/2013	Senior Service Fellow, Centers for Disease Control and Prevention	Ex Officio Member

Number of Committee Members Listed: 17

Narrative Description

The Advisory Committee on Childhood Lead Poisoning Prevention shall provide advice and guidance to the Secretary; the Assistant Secretary for Health; and the Director, Centers for Disease Control and Prevention (CDC), regarding new scientific knowledge and technological developments and their practical implications for childhood lead poisoning prevention efforts. The Committee shall also review and report regularly on childhood lead poisoning prevention practices and recommend improvements in national childhood lead poisoning prevention efforts. This committee was terminated October 31, 2013 and did not meet in FY13 generating no costs to the committee.

What are the most significant program outcomes associated with this committee?

	Checked if Applies
Improvements to health or safety	<input checked="" type="checkbox"/>
Trust in government	<input checked="" type="checkbox"/>
Major policy changes	<input checked="" type="checkbox"/>
Advance in scientific research	<input checked="" type="checkbox"/>
Effective grant making	<input type="checkbox"/>
Improved service delivery	<input type="checkbox"/>
Increased customer satisfaction	<input checked="" type="checkbox"/>
Implementation of laws or regulatory requirements	<input type="checkbox"/>
Other	<input type="checkbox"/>

Outcome Comments

This committee was terminated October 31, 2013 and did not meet in FY13 generating no

costs to the committee.

What are the cost savings associated with this committee?

Checked if Applies

None	<input type="checkbox"/>
Unable to Determine	<input checked="" type="checkbox"/>
Under \$100,000	<input type="checkbox"/>
\$100,000 - \$500,000	<input type="checkbox"/>
\$500,001 - \$1,000,000	<input type="checkbox"/>
\$1,000,001 - \$5,000,000	<input type="checkbox"/>
\$5,000,001 - \$10,000,000	<input type="checkbox"/>
Over \$10,000,000	<input type="checkbox"/>
Cost Savings Other	<input type="checkbox"/>

Cost Savings Comments

There is no methodology to accurately determine cost saving directly associated with actions by the committee.

What is the approximate Number of recommendations produced by this committee for the life of the committee?

27

Number of Recommendations Comments

The Laboratory Workgroup was established in November 2011 to investigate and report on five issues: proficiency testing (PT) limits; guidelines for point of care lead testing; alternative matrices for assessing exposure to lead; environmental lead analytical issues; and, reference intervals for adult lead exposure. The Laboratory Workgroup compiled a draft report entitled Guidelines for Measuring Lead in Blood Using Point of Care Instruments. This draft report provides 19 guidelines for point of care lead testing. The draft report was approved by the ACCLPP with the understanding that the document would be revised based on the input provided during the teleconference meeting.

What is the approximate Percentage of these recommendations that have been or will be Fully implemented by the agency?

87%

% of Recommendations Fully Implemented Comments

Some recommendations supercede outdated recommendations. Recommendations are implemented by CDC, require agreement with other federal agencies, and grantees.

Grantees and other federal agencies often require additional time implement due to conflicting federal rules, funding constraints, or structure.

What is the approximate Percentage of these recommendations that have been or will be Partially implemented by the agency?

13%

% of Recommendations Partially Implemented Comments

Recommendations partially implemented are sometimes supplemental to original recommendation. Recommendations are implemented by CDC and grantees. Grantees require additional time implement due to local policy and structure.

Does the agency provide the committee with feedback regarding actions taken to implement recommendations or advice offered?

Yes ☒ No ☐ Not Applicable ☐

Agency Feedback Comments

Formal presentations at committee meetings and monthly updates of committee chair via scheduled phone calls. CDC representative provides ACCLPP meeting with CDC updates and guidelines. CDC representative brings back CDC feedback in-progress tasks and current CDC policy.

What other actions has the agency taken as a result of the committee's advice or recommendation?

Checked if Applies

Reorganized Priorities	<input checked="" type="checkbox"/>
Reallocated resources	<input type="checkbox"/>
Issued new regulation	<input type="checkbox"/>
Proposed legislation	<input type="checkbox"/>
Approved grants or other payments	<input type="checkbox"/>
Other	<input type="checkbox"/>

Action Comments

This committee was terminated October 31, 2013 and did not meet in FY13 generating no costs to the committee.

Is the Committee engaged in the review of applications for grants?

No

Grant Review Comments

ACCLPP is not a grant review committee.

How is access provided to the information for the Committee's documentation?
