**20a. How does the Committee accomplish its
purpose?**

The Panel drew on the expertise of its members and other sources to provide advice and make recommendations to the Associate Administrator for Space Operations on plans, policies, programs, and other matters pertinent to the Space Operations Mission Directorate's

responsibilities. It included integrating and implementing aerospace industry approaches, resources, and capabilities to support the Space Shuttle Program (SSP), the International Space Station (ISS), and the future needs of the Agency.

20b. How does the Committee balance its membership?

Membership was selected from among industry representatives to ensure a balanced representation of expertise and points of view in scientific and technical areas relevant to space flight and exploration

20c. How frequent and relevant are the Committee Meetings?

The committee met twice. The meetings were imperative to report, discuss and convey background, purpose and preliminary findings of the committee.

20d. Why can't the advice or information this committee provides be obtained elsewhere?

The NASA Administrator determined that it was in the public interest in connection with the performance of duties imposed on the Agency by law. There was a clear need for scientific and technical advice.

20e. Why is it necessary to close and/or partially closed committee meetings?

N/A

21. Remarks

This advisory committee accomplished its purpose and was terminated by NASA on July 26, 2005.

Narrative Description

The new Vision for Space Exploration requires structural and programmatic changes. Implementing this Space Vision will require not only changes in the government structure, but in the private industrial support sector. It was especially important to NASA that this committee was formed to give advice in conjunction with internal NASA panels on related subjects. This committee was composed of members from all parts of the aerospace sector and provided crucial information for the implementation of the future plans for NASA. It is critical to NASA’s future to have opinions of the support contractors on how to integrate and implement aerospace approaches, resources and capabilities to support the Space Shuttle Program, the International Space Station program and our transition into the new Vision.
