#### **Meetings and Dates**

| Purpose  | Start      | End          |
|--|------------|--------------|
| The purpose of the first meeting was to define the task of developing the Exploration Transportation System Strategic Roadmap and generate the plans to accomplish the task. In addition, the meeting was used to present information on the Exploration Vision, the Agency, and the Space Transportation community that would implement the roadmap. A final goal was to begin defining the boundaries of the roadmap as well as any additional information the Committee members required for their deliberations. | 02/03/2005 | - 02/04/2005 |
| The purpose of the second meeting was review draft top-level and detailed roadmaps and update as necessary. In addition, a number of briefings were given as a result of requests made at the first Committee meeting, mostly involving the other Strategic Roadmap and Capability Roadmap Committees with areas that interface with the Exploration Transporation System.   |            | - 04/19/2005 |

### 20a. How does the Committee accomplish its purpose?

The Committee drew upon on the expertise of its members and other sources to provide advice and recommendations to NASA on developing a new launch system and crew exploration vehicle to provide transportation to and beyond low Earth orbit. Any subcommittees and/or task forces to be established to conduct special studies were to report their findings and recommendations to the Committee.

### 20b. How does the Committee balance its membership?

Membership was selected to assure a balanced representation of expertise and points of view within the government, academia, and private industry.

### 20c. How frequent and relevant are the Committee Meetings?

Estimated Number of Meetings per Year - 4. Actual number of meetings - 2.

### 20d. Why can't the advice or information this committee provides be obtained elsewhere?

The Committee was needed to provide a broad range of views representative from across the aerospace community to support the creation of the NASA Integrated Strategic Architecture.

Recommendations to be provided by the Committee were to help guide Agency program

prioritization, budget formulation, facilities and human capital planning, and technology investment.

# 20e. Why is it necessary to close and/or partially closed committee meetings? N/A

#### 21. Remarks

This Committee was terminated at the direction of the NASA Administrator.

#### **Designated Federal Officer**

#### Dana Gould

**Number of Committee Members Listed: 15** 

#### **Narrative Description**

The Committee's Strategic Roadmap was to provide a framework for the development of the Agency's next Space Transportation System identifing milestones, options, and key decisions along with the timeframe for their resolution. The roadmap development

process was to identify capabilities, facilities, human capital, and infrastructure required to develop and implement a space transportation system for the Agency's Exploration Mission.

### What are the most significant program outcomes associated with this committee?

|                                      | Checked i | f |
|--------------------------------------|-----------|---|
|                                      | Applies   |   |
| Improvements to health or safety     |           |   |
| Trust in government                  |           | ✓ |
| Major policy changes                 |           |   |
| Advance in scientific research       |           | ✓ |
| Effective grant making               |           |   |
| Improved service delivery            |           |   |
| Increased customer satisfaction      |           |   |
| Implementation of laws or regulatory |           |   |
| requirements                         |           |   |
| Other                                |           |   |

#### **Outcome Comments**

The Committee's Strategic Roadmap was to provide strategic guidance for developing a new Space Transportation System, a system that will be at the core of NASA's Exploration mission. The committee was drawn from leaders in industry, academia, as well as government (both internal and external to NASA), and thus provided an avenue of communication with the external community.

#### What are the cost savings associated with this committee?

|                            | Checked if Applies |
|----------------------------|--------------------|
| None                       |                    |
| Unable to Determine        | ✓                  |
| Under \$100,000            |                    |
| \$100,000 - \$500,000      |                    |
| \$500,001 - \$1,000,000    |                    |

| \$5,000,001 - \$10,000,000 |                    |
| Over \$10,000,000          |                    |
| Cost Savings Other         |                    |

#### **Cost Savings Comments**

These Committee was to provide guidance for the planning of a long-term program (30+ years); the cost savings is unclear.

What is the approximate <u>Number</u> of recommendations produced by this committee for the life of the committee?

0

#### **Number of Recommendations Comments**

The Committee's was to prepare a final report that provided roadmap for the development of a new Space Transporation system which identified a number of key decisions and the timeframe in which they would be made. Since the Committee was terminated prior to completion of this effort, the NASA staff prepared a Summary Report document.

What is the approximate  $\underline{\text{Percentage}}$  of these recommendations that have been or will be  $\underline{\text{Fully}}$  implemented by the agency? 0%

#### % of Recommendations Fully Implemented Comments

The NASA prepared Summary Report contained a long range plan; implementation will take several decades to implement.

What is the approximate <u>Percentage</u> of these recommendations that have been or will be <u>Partially</u> implemented by the agency?

25%

#### % of Recommendations Partially Implemented Comments

A number of decisions pertaining to the space transportation system's launch vehicle for crew and cargo have been made.
