20a. How does the Committee accomplish its purpose?

Section 492 of the PHS Act states that The Secretary...shall by regulation require appropriate technical and scientific peer review of -- (A) applications...; and (B) biomedical and behavioral research and development contracts... This committee is composed of recognized biomedical and/or behavioral research authorities who represent the forefront of research and technical knowledge and who provide first-level merit review of highly scientific and technical research grant applications and contract proposals in genetics, developmental biology, cell biology, molecular biology, biophysics, chemistry, biochemistry, physiology and pharmacological

sciences. Operation of this committee is accomplished using a fluid membership, with members designated to serve for individual meetings rather than formally appointed for fixed terms of service. During this reporting period the committee reviewed 312 applications requesting \$1,134,115,631. The committee also reviewed 20 loan repayment applications in the amount of \$700,000.

20b. How does the Committee balance its membership?

This committee has a fluid membership, with members designated to serve for individual meetings rather than formally appointed for fixed terms of service. The reviewers for each meeting are selected to evaluate grant applications or contract proposals for a specific, perhaps narrow, expertise area. Participants for each meeting are assembled to most efficiently and effectively cover the number and breadth of applications or contracts requiring review.

20c. How frequent and relevant are the Committee Meetings?

The National Institute of General Medical Sciences Special Emphasis Panel held 27 meetings during this reporting period. The flexibility in review allowed by this committee structure has proved both efficient and effective. Members also participated in the activities as described in Item 21.

20d. Why can't the advice or information this committee provides be obtained elsewhere?

This committee is composed of recognized biomedical and/or behavioral research authorities who represent the forefront of research and technical knowledge and who provide first-level

merit review of highly scientific and technical research grant applications and contract proposals. These evaluations and recommendations cannot be obtained from other sources because the specialized, complex nature of the applications and proposals requires a unique balance and breadth of expertise not available on the NIH staff or from other established sources.

20e. Why is it necessary to close and/or partially closed committee meetings?

The meetings of the National Institute of General Medical Sciences Special Emphasis Panel were closed to the public for the review of grant applications. Sections 552b(c)(4) and 552b(c)(6) of the Government in the Sunshine Act permit the closing of meetings where discussion could reveal confidential trade secrets or commercial property such as patentable material and personal information, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

21. Remarks

The dates of the committee's other activities follows: 10/2-3/03; 10/6-7/03; 10/7-8/03; 10/9-10/03; 10/13-14/03; 10/16-17/03; 10/20-21/03; 10/21/03; 10/21/03; 10/23-24/03; 10/27-28/03; 10/29-30/03; 11/3/03; 11/21/03; 02/9-10/04; 02/9-10/04; 02/12-13/04; 02/25/04; 06/7-8/04; 06/13-14/04; 06/15-16/04; 06/21-22/04; 06/27-28/04; 07/15-16/04; 07/21-22/04.

Narrative Description

The goal of NIH research is to acquire new knowledge to help prevent, detect, diagnose, and treat disease and disability, from the rarest genetic disorder to the common cold. The NIH mission is to uncover new knowledge that will lead to better health for everyone. NIH works toward that mission by supporting the research of non-Federal scientists in universities, medical schools, hospitals, and research institutions throughout the country and abroad. Section 492 of the PHS Act states that The Secretary...shall by regulation require appropriate technical and scientific peer review of -- (A) applications; and (B) biomedical and behavioral research and development contracts. This committee will be composed of recognized biomedical and behavioral research authorities who represent the forefront of research and technical knowledge and who provide first-level merit review of highly scientific and technical research grant applications (and/or contract proposals) that focus on scientific areas relevant to broad areas of biomedical research and the behavioral sciences, such as genetics, developmental biology, cell biology, molecular biology, biophysics, chemistry, biochemistry, physiology and pharmacological sciences. Operations of this committee are accomplished using a fluid membership with members designated to serve for individual meetings rather than formally appointed for fixed terms of service. During this reporting period, the committee provided state-of-the-art scientific peer review in support of research supported by the Institute insuring that the momentum of scientific research in the biomedical and behavioral fields remains strong so that innovations and advances may be developed to benefit the health and well-being of the public.
