20a. How does the Committee accomplish its purpose?

These panels reviewed approximately 3,791 unsolicited proposals submitted to the six Division program elements as well as submissions in response to special initiatives (i.e., EPA/NSF, NSF/DARPA initiatives, etc.) and NSF-wide annual solicitations (CAREER, REG, MRI, SBIR, NIRT, NER, NSEC). These panels review and make recommendations for the disposition of 95% of the proposals received in the Division. (The other 5% are mail reviewed and, in special cases, internally reviewed.) In the case of SBIR, an NSF-wide program, the division administers panels on behalf of the entire foundation.

20b. How does the Committee balance its membership?

Membership in all panels reflects an appropriate mix of academic and industrial expertise in accordance with each program area. Efforts are also made to reflect an appropriate balance of women, minorities and disabled members, as well as geographic representation.

20c. How frequent and relevant are the Committee Meetings?

The division reviewed almost 10% of the total number of proposals reviewed by the NSF. During FY03, a total of 269 review proposal panels were held to review these proposals.

20d. Why can't the advice or information this committee provides be obtained elsewhere?

The only other option for the proposal review

process is mail review. This option is not feasible given the current volume of proposals received in the Division of Design and Manufacturing Systems. Further, it is our assessment that providing the opportunity for reviewers to discuss and compare proposals improves the quality of the review process.

20e. Why is it necessary to close and/or partially closed committee meetings?

To review proposals that included information of a proprietary nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals.

21. Remarks

Designated Federal Officer

Warren DeVries Division Director, DMII

Narrative Description

The NSF mission is set out in the NSF Act of 1950 authorizes and directs the Agency to initiate and support: basic scientific research and research fundamental to the engineering process; and science and engineering education programs at all levels and in all fields of science and engineering. The involvement of knowledgeable peers from outside the Foundation in the review of proposals is the keystone of NSF's proposal review systems. Their judgments of the extent to which proposals address the broader impact and intellectual merit review criteria are vital for incoming NSF Staff and influencing funding recommendations.
