Support Years (FTE)**20a. How does the Committee accomplish its purpose?**

The Commission consults with every appropriate local advisory committee and regional council consultation process directed by P.L. 96-487 (the Alaska National Interest Lands Conservation Act), the Commission is required to hold public meetings in all areas affected by the subsistence hunting program. Federal law and regulation provide the opportunity for continued subsistence uses, including hunting, fishing, and trapping within Lake Clark National Park. The Commission was established by Congress to devise and recommend to the Secretary of the Interior and the Governor of Alaska a program for subsistence hunting within Lake Clark National Park. The Commission's recommendations help the NPS to ensure the continuation of the opportunity for local rural residents to engage in the subsistence use of resources in Lake Clark National Park and Preserve. The NPS has adopted the following mission statement to guide its activities.

Subsistence will be managed as a legislated use consistent with the provisions of ANILCA, the Organic Act of 1916, and the park's enabling legislation to:

- protect the opportunity for qualified local rural residents to continue traditional subsistence activities
- recognize that subsistence ways of life differ from region to region and are continuing to evolve, and where appropriate, park management practices may reflect regional diversity and evolution
- promote local involvement and participation in processes associated with subsistence management
- ensure that management practices involving the utilization of public lands adequately consider the potential for

restriction of subsistence uses and impacts upon subsistence resources •ensure that management of park resources is consistent with the conservation of unimpaired ecosystems and natural and healthy populations of fish and wildlife, incorporating scientific data and principles with traditional knowledge and cultural values and•promote effective communication and mutual understanding of subsistence uses and related cultural and social values, and park purposes and protection,between the NPS, subsistence users, the State of Alaska and the public.

20b. How does the Committee balance its membership?

Membership, as prescribed by the Commission's enabling legislation, consists of nine members as follows: (a) three members appointed by the Secretary of the Interior; (b) three members appointed by the Governor of Alaska; and (c) three members appointed by the regional council, as established by the Secretary or the State pursuant to section 805 of P.L. 96-487. The members include a range of individuals having personal knowledge of the region's subsistence.

20c. How frequent and relevant are the Committee Meetings?

The SRC generally meets twice a year, or as often as circumstances require. Commission recommendations are vitally important on matters relating to the taking of wildlife within the park, and are the foundation for the development and review of the subsistence hunting program. During FY19 the Commission conducted two meetings.

20d. Why can't the advice or information this committee provides be obtained elsewhere?

The Commission is a forum that promotes

effective communication and mutual understanding of subsistence uses and related cultural resources. The Commission is regularly consulted by the National Park Service to provide input and make recommendations on issues affecting subsistence management within Lake Clark National Park and Preserve.

20e. Why is it necessary to close and/or partially closed committee meetings?

All meetings are open.

21. Remarks

The Lake Clark National Park Subsistence Resource Commission did not submit formal subsistence hunting plan recommendations to the Secretary of Interior during FY 2019. The commission did however discuss and act on the following topics: write a letter on behalf of the SRC in support of Alternative 2 (no action) on the EA for the Wildlife Rule changes, write a letter asking pilots to avoid flying low over the Chulitna River during moose season, request the park conduct a 13.440 eligibility survey in Pt. Alsworth to see how many people would qualify. Commission members shared their observations of natural resources since the last meeting and agency staff provided information updates on regulatory processes and research.

Narrative Description

Federal law and regulation provide the opportunity for continued subsistence uses, including hunting, fishing and trapping within Lake Clark National Park. The Commission is a forum that promotes effective communication and mutual understanding of subsistence uses and related cultural resources. The Commission consults with every appropriate local advisory committee and regional council for comment and input on draft hunting plan recommendations. In addition to the advisory committee and regional council consultation process directed by P.L. 96-487 (the Alaska National Interest Lands Conservation Act), the Commission is required to hold public meetings in all areas affected by the subsistence hunting program. During FY2019, the Commission conducted two meetings. The Subsistence Resource Commission for Lake Clark National Park was established by the Congress to devise and recommend to the Secretary of the Interior and the Governor of Alaska a program for subsistence hunting within Lake Clark National Park. The Commission's unique insight on local customary and traditional patterns of subsistence use within the park has been important in developing workable subsistence hunting plan recommendations. The Commission's recommendations help the NPS to ensure the continuation of the opportunity for local rural residents to engage in the subsistence use of resources in Lake Clark National Park and Preserve.

What are the most significant program outcomes associated with this committee?

Checked if
Applies

- Improvements to health or safety
- Trust in government
- Major policy changes
- Advance in scientific research
- Effective grant making
- Improved service delivery
- Increased customer satisfaction
- Implementation of laws or regulatory requirements
- Other

Outcome Comments

The Lake Clark National Park Subsistence Resource Commission did not submit formal subsistence hunting plan recommendations to the Secretary of Interior during FY 2019. The commission did however discuss and act on the following topics: write a letter on behalf of the SRC in support of Alternative 2 (no action) on the EA for the Wildlife Rule changes, write a letter asking pilots to avoid flying low over the Chulitna River during moose season, request the park conduct a 13.440 eligibility survey in Pt. Alsworth to see how many people would qualify. Commission members shared their observations of natural resources since the last meeting and agency staff provided information updates on regulatory processes and research.

What are the cost savings associated with this committee?
